Study Of Teaching:

A Conception of Teaching Nathaniel L. Gage, 2009-04-05 The literature of the behavioural and social sciences is full of theory and research on learning and memory Teaching is comparatively a stepchild neglected by those who have built a formidable body of theories of learning and memory However teaching is where learning and memory theory should pay off A *Conception of Teaching* dedicates a chapter to each of the following important components the need for a theory the possibility of a theory the evolution of a paradigm for the study of teaching a conception of the process of teaching a conception of the content of teaching a conception of students cognitive capabilities and motivations a conception of classroom management and the integration of these conceptions Written in a highly accessible style while maintaining a base in research Dr Nathaniel L Gage presents *A Conception of Teaching* with clarity and well situated within current educational debates

[Practice Makes Practice](#) Deborah P. Britzman, 2012-02-16 This revised edition of the classic text explores the complexity of what learning to teach means While the research on teacher education continues to proliferate *Practice Makes Practice* remains the discipline's indispensable classic text Drawing upon critical ethnography this new edition of this best selling book asks the question what does learning to teach do and mean to newcomers and to those who surround them Deborah P Britzman writes poignantly of the struggle for significance and the contradictory realities of secondary teaching She offers a theory of difficulty in learning and explores why the blaming of individuals is so prevalent in education The completely revised introduction presents a refined and further developed theoretical framework and analysis discussing why we might return to a study of teaching and learning Also included in this updated edition is an insightful hidden chapter that comments on the methodology of the study and some of the dilemmas the

author continues to face as her own thinking develops around the issues of representing teaching and learning for those just entering the profession Deborah P Britzman is Distinguished Research Professor at York University She is the author of many books including *The Very Thought of Education* Psychoanalysis and the Impossible Professions After Education Anna Freud Melanie Klein and Psychoanalytic Histories of Learning and Lost Subjects Contested Objects Toward a Psychoanalytic Inquiry of Learning all published by SUNY Press *An Introduction to the Study of Education and to Teaching* Ellwood Patterson Cubberley,1927 [Research in Classrooms](#) Lorin W. Anderson,Robert Bounds Burns,1989 This book is the only one to date which takes up epistemological issues concerning classroom research and pursues them in relation to design and methodological matters with depth and balance It deals with all of the perennial issues that have divided scholars in the field and contributes more to achieving points of reconciliation than has previously been available This is not yet another substantive review of the findings of classroom research It makes no attempt to portray the current state of knowledge of such topics as teacher praise student initiations teacher interactive decision making student deviance homework student engagement and the like This is more a book about classroom research for those who want to learn how to teach by digesting the products of research and it does not justify its existence in the deficiencies of the past Indeed it sees strengths and shortcomings in many different approaches This book gives students tremendous potential to capitalise on the experience and accumulated wisdom of decades of scholars so as to emerge from it with high levels of understanding and knowledge of the field It also contains historical material which provides an excellent record of developments over time and gives many fully descriptive examples of earlier achievements *On the Teaching of English in Elementary and High Schools* George Pliny Brown,National Society for the Scientific Study of Education,1906 *Teaching Better* Bradley A. Ermeling,Genevieve Graff-Ermeling,2016-03-03 Discover the power of collaborative inquiry This unique visually stunning resource is packed with details to ignite and sustain the collaborative improvement of teaching and learning Includes US and international case studies powerful metaphors application exercises a leader s guide a companion website digital templates and more Learn what lesson study and collaborative inquiry can and should look like Find the guidance you need to lead and support schoolwide inquiry based improvement A true inspiration for educators who want to improve both their own craft and the methods of the profession Jim Stigler James Hiebert Authors of *The Teaching Gap* **International handbook of self-study of teaching and teacher education practices. 2** J. John Loughran,2004 **Handbook of Nature-study for Teachers and Parents** Anna Botsford Comstock,1911 [Self-Study Research Methodologies for Teacher Educators](#) ,2019-02-11 *Study Research Methodologies for Teacher Educators* is a comprehensive text that delineates a range of research methodologies This edited volume with many chapters written by self study scholars who are noted in the field for particular methodological and epistemological perspectives helps fill the gap in the literature on self study research methods It provides readers with an opportunity to examine various methodologies which will not only help them deepen their

understanding of research but also will allow them to select one that best suits their needs Both new and experienced researchers will find this text valuable We consider Self Study Research Methodologies for Teacher Educators a valuable contribution to the field of teacher education

Investigating the Teacher's Life and Work Ivor F. Goodson,2008-01-01 Investigating the Teacher s Life and Work attempts to bring together the methodological and substantive aspects of studying the teacher s life and work Some of the chapters in the book provide a how to do approach for those wishing to study the teacher s life and work employing a life history method whilst other chapters provide the kind of substantive and generic findings which might be anticipated when conducting life history work The focus on professional

life and work has been growing rapidly in the last two or three decades There are a number of reasons for this Firstly there is a methodological impulse many new studies are adopting a life history approach The life history tradition aims to understand the interface between people s life and their work It also seeks to explore the historical context and the socio political circumstances in which people s life and work is located A further major reason for investigating the teacher s life and work at the moment is the huge range of restructuring initiatives taking place throughout the educational world There is a kind of world movement to restructure education and health certainly in most Western countries Generally this takes the form of the introduction of the three T s targets tests and tables and the increasing accountability and performativity regimes associated with these new forms of evaluation Significantly these initiatives have been introduced at governmental level in most countries with the minimum of consultation with teacher workforces As a result there is growing evidence of a clash between professional life and work missions and the restructuring initiatives which aim to transform these missions Perhaps the best way to explore this increasingly acute clash of values is through the investigation of professional life and work Investigating the Teacher s Life and Work aims to bring together the methodological and substantive approaches and to show how this kind of study can increase our understanding of the interface between government intentions and teacher s beliefs and motives
