Your Brain Is Playing Tricks On You Albert Moukheiber, 2024-07-23 Why are we often convinced that we're right even when we're wrong Why are we jealous or paranoid even when we have absolutely no reason to be Why is it so easy for fake news to spread around the globe and fool us It's because we don't see the world as it is rather we reconstruct it in our mind Reality is way too complex and multiple to be apprehended by our capacities of attention which are quite limited as well as our brain abilities That is why our perception of the world is subjective and various elements influence the way we acquire knowledge and form opinions Our brain is recreating the world in its own way most of the time for our own good how hard would it be if before making a choice we had to know about all the options available in a given situation It would take us forever to choose an item of clothing in a store or a meal in a restaurant Luckily our brain can estimate even if it makes us imperfect and subject to illusion delusion and error it allows us to reconstruct the world as we know it and live in it However these very useful mechanisms can sometimes mislead us and have a rather negative impact on our actions beliefs and opinions when our brain behaves that way we say it is biased Albert Moukheiber gives us tips and tricks to fight against these cognitive biases the first one being not to trust ourselves too much and to always doubt our thinking processes especially in this era where social networks spread information like an epidemic In this book filled with multiple examples from our daily lives and psychosocial experiments Moukheiber explores the building blocks of our perception cognition and behaviour which are involved in acquiring knowledge or forming opinions Dr Albert Moukheiber is a neuroscientist and clinical psychologist He has worked for 10 years in the psychiatry department at the Hôpital Pitié Salpêtrière focusing mainly on anxiety disorders and resilience He now works as a clinician at his practice and teaches at the University Paris 8 in the clinical psychology department He has also founded Chiasma a structure that is interested in how our brain reconstructs reality to confirm our prior beliefs and how to promote mental flexibility Chiasma focuses on how we form opinions and the impact of these mechanisms on our decision making Albert is also a lecturer and a lead workshop developer for businesses and shares the latest scientific discoveries on behaviour and cognition and how they impact our daily lives

The Illusionist Brain Jordi Camí, Luis M. Martínez, 2024-12-03 How magicians exploit the natural functioning of our brains to astonish and amaze us How do magicians make us see the impossible The Illusionist Brain takes you on an unforgettable journey through the inner workings of the human mind revealing how magicians achieve their spectacular and seemingly impossible effects by interfering with your cognitive processes Along the way this lively and informative book provides a guided tour of modern neuroscience using magic as a lens for understanding the unconscious and automatic functioning of our brains We construct reality from the information stored in our memories and received through our senses and our brains are remarkably adept at tricking us into believing that our experience is continuous In fact our minds create our perception of reality by elaborating meanings and continuities from incomplete information and while this strategy carries clear benefits for survival it comes with blind spots that magicians know how to exploit Jordi Cam and Luis Mart nez explore the many different ways illusionists manipulate our attention making us look but not see and take advantage of our individual predispositions and fragile memories The Illusionist Brain draws on the latest findings in neuroscience to explain how magic deceives us surprises us and amazes us and demonstrates how illusionists skillfully hack our brains to alter how we perceive things and influence what we imagine
