## **Value Change In Global Perspective:**

**Value Change in Global Perspective** Paul Abramson, Ronald F. Inglehart, 2009-08-12 In this pioneering work Paul R. Abramson and Ronald Inglehart show that the gradual shift from Materialist values such as the desire for economic and physical security to Post materialist values such as the desire for freedom self expression and the quality of life is in all likelihood a global phenomenon Value Change in Global Perspective analyzes over thirty years worth of national surveys in European countries and presents the most comprehensive and nuanced discussion of this shift to date By paying special attention to the way generational replacement transforms values among mass publics the authors are able to present a comprehensive analysis of the processes through which values change In addition Value Change in Global Perspective analyzes the 1990-91 World Values Survey conducted in forty societies representing over seventy percent of the world's population These surveys cover an unprecedentedly broad range of the economic and political spectrum with data from low income countries such as China India Mexico and Nigeria newly industrialized countries such as South Korea and former state socialist countries in Eastern Europe and the former Soviet Union This data adds significant new meaning to our understanding of attitude shifts throughout the world Value Change in Global Perspective has been written to meet the needs of scholars and students alike The use of percentage percentage differences and algebraic standardization procedures will make the results easy to understand and useful in courses in comparative politics and in public opinion Paul R. Officer JST RISTEX      **Environmental Engagement and Cultural Value: Global Perspectives for Protecting the Natural World** Fanli Jia, Tobias Krettenauer, 2020-02-04 Environmental issues are a rapidly growing focal point in today's global discussion. These issues are becoming increasingly pertinent due to the potentially devastating outcomes of human environmental carelessness. As a species, humans now have realized the need for worldwide environmental engagement. This engagement is intended to heighten awareness about environmental problems, build knowledge in education, and change human behaviors to improve sustainability. Synthesizing the literature on cultural dimensions, e.g., attitudes, beliefs, values, that undergird positive views of environmental issues and engagement of sustainability practices would significantly contribute to the development of effective approaches to fostering sustainable environmental practices. Through the identification of commonalities across cultures and sensitivity to cultural differences, we can begin to work toward a global consensus on viable solutions to this critical issue.      *Global Perspectives on the Politics of Multiculturalism in the 21st Century* Fethi Mansouri, Boulou Ebanda de B'éri, 2014-06-05 Multiculturalism is now seen by many of its critics as the source of intercultural and social tensions, fostering communal segregation and social conflicts. While the cultural diversity of contemporary societies has to be acknowledged as an empirical and demographic fact, whether multiculturalism as a policy offers an optimal conduit for intercultural understanding and social harmony has become increasingly a matter of polarised public debate. This book examines the contested philosophical foundations of multiculturalism and its often controversial applications in the context of migrant societies. It also explores the current theoretical debates about the extent to which multiculturalism and related conceptual constructs can account for the various ethical challenges and policy dilemmas surrounding the management of cultural diversity in our contemporary societies. The authors consider common conceptual and empirical features from a transnational perspective through analysis of the case studies of Australia, Canada, Columbia, Germany, New Zealand, the United Kingdom, and Uruguay. This book will be of interest to students and scholars of political science, comparative politics, international studies, multiculturalism, migration, and political sociology.      **Media, Sex, Violence, and Drugs in the Global Village** Yahya R. Kamalipour, Kuldip R. Rampal, 2001 Providing a multicultural analysis of the impact of globalized Western media, this guide specifically deals with sex, violence, and drugs. The text proposes a framework for understanding the political, social, and economic problems that face media policy makers in an age of globalization.      Tracing Value Change in the International Legal Order Heike Krieger, Andrea Liese, 2023-04-28 International law is constantly navigating the tension between preserving the status quo and adapting to new exigencies. But when and how do such adaptation processes give way to a more profound transformation if not a crisis of international law? To address the question of how attacks on the international legal order are changing the value orientation of international law, this book brings together scholars of international law and international relations. By combining theoretical and methodological analyses with individual case studies, this book offers readers conceptualizations and tools to systematically

examine value change and explore the drivers and mechanisms of these processes These case studies scrutinize value change in the foundational norms of the post 1945 order and in norms representing the rise of the international legal order post 1990 They cover diverse issues the prohibition of torture the protection of women s rights the prohibition of the use of force the nonproliferation of nuclear weapons sustainability norms and accountability for core international crimes The challenges to each norm the reactions by norm defenders and the fate of each norm are also studied Combined the analyses show that while a few norms have remained surprisingly robust several are changing either in substance or in legal or social validity The book concludes by integrating the conceptual and empirical insights from this interdisciplinary exchange to assess and explain the ambiguous nature of value change in international law beyond the extremes of mere progress or decline

*Culture and Politics* Jan-Erik Lane,Uwe Wagschal,2013-06-17 This concise accessible text presents an overview of the relevance of culture for politics Culture figures prominently in the theories of the great classics such as Marx Durkheim and Weber Recently the cultural approach to politics has developed quickly and the concept of political culture has played a role in these developments particularly given the emergence of large scale survey research into political value orientations Seeking to outline this rapid development the book is divided into three sections Section I of the book discusses the relevance of cultural perspectives to political analysis including discussion of the most significant concepts and methods Section II looks at the core elements of political culture tradition ethnicity and religion Section III examines emerging research avenues and opportunities including social capital value orientations in the postmodern world newer formulations of political culture such as gender and sexuality and the influence of the environment Drawing on a wealth of examples and a comprehensive analysis of comparative data this textbook is essential reading for all students of political culture research methods political sociology and comparative politics

Transforming Markets in the Built Environment Susan Roaf,2012 There is an urgent need to build human capacity to make the often vulnerable and exposed buildings and communities we live and work in more resilient to the changing social economic and physical environments around us Extensive research has been done over the last decades on both mitigation and adaptation to climate change in the built environment but the outputs of much of this research have failed to result in the wider uptake of effective greenhouse gas emission reduction solutions This volume introduces credible fresh thinking on how this may be done For the first time an emerging generation of research is brought together that is directly concerned with understanding influencing and leading the transformation of markets and thinking in the built environment Chapters cover defining values setting targets consumer motivation selling existing ideas better developing new design principles paradigms and programmes optimizing solutions to ensure that when change does happen it does so in the right direction Papers are contributed by leading experts in fields ranging from philosophy the social political and physical sciences engineering architecture mathematics and complexity science The resulting volume will be essential reading for all those involved with changing the mindsets of a generation on the need to and ways to build

**Global Organizational Theory Perspectives** Jagdish N. Sheth, Golpira S. Eshghi, 1990      **The Challenges of Theories on Democracy** Stein Ugelvik Larsen, 2000 In the introduction to *The Second Sex* Simone de Beauvoir notes that a man never begins by establishing himself as an individual of a certain sex his being a man poses no problem Nancy Bauer begins her book by asking Then what kind of a problem does being a woman pose Bauer's aim is to show that in answering this question *The Second Sex* dramatizes the extent to which being a woman poses a philosophical problem This book is a call for philosophers as well as feminists to turn or return to *The Second Sex* Bauer shows that Beauvoir's magnum opus written a quarter century before the development of contemporary feminist philosophy constitutes a meditation on the relationship between women and philosophy that remains profoundly undervalued She argues that the extraordinary effect *The Second*

Sex has had on women's lives then and now can be traced to Beauvoir's discovery of a new way to philosophize a way grounded in her identity as a woman. In offering a new interpretation of *The Second Sex*, Bauer shows how philosophy can be politically productive for women while remaining genuinely philosophical.
