Var The Stick:

Var the Stick Piers Anthony, 1972 **Locative and existential predication** Chris Lasse Däbritz, Josefina Budzisch, Rodolfo Basile, 2025-09-29

Locative and existential predications are fundamental linguistic constructions that exhibit significant formal overlap while serving distinct communicative functions. Locative clauses typically anchor a definite referent to a spatial context, whereas existential clauses introduce new, often indefinite referents into discourse. Despite their central role in syntactic and typological research, the cross-linguistic diversity of these predications remains largely underexplored. This collective volume originates from workshops held in 2023 at the Annual SLE Meeting in Athens and the International Conference on Historical Linguistics in Heidelberg. It brings together in-depth analyses of locative and existential predications across a wide range of languages, drawing on diverse methodological and theoretical approaches. Rather than imposing a single framework, the volume deliberately allows for variation in how these constructions are defined and analyzed, reflecting the complexity and diversity of linguistic structures. A key theme of the book is the relationship between locative, existential, and possessive predication. Many of the included studies highlight the formal and functional connections between these domains, illustrating how different languages encode possession through structures that overlap with locative and existential constructions. The volume also challenges conventional assumptions about structural distinctions between these predications, showing that in many languages, such boundaries are blurred or even nonexistent. The introductory chapter reviews key findings from prior research and offers a refined typology of locative and existential predications. It also highlights the major insights from the remaining chapters, each of which provides a detailed empirical analysis of these constructions in one or several underdescribed languages. The contributions address:

- the structural and functional properties of locative and existential clauses
- criteria for distinguishing these constructions in languages where formal differentiation is minimal
- their frequency and usage in natural discourse
- grammaticalization pathways that link locative, existential, and possessive predication.

By integrating data from a broad range of languages and perspectives, this volume advances our understanding of locative and existential predication and offers a foundation for future research in typology, syntax, and historical linguistics.

AdvancED ActionScript 3.0 Animation Keith Peters, 2009-01-25

This book is a compilation of advanced ActionScript 3.0 animation techniques for any user creating games, user interaction, or motion control with ActionScript. It is an anthology of topics that follow from the author's earlier book *Foundation ActionScript 3.0 Animation: Making Things Move* and things that became possible in version 1.0 of Flash Player. This book covers a diverse selection of topics that don't necessarily lead one into the other. You don't need to start with Chapter 1 and read it cover to cover. Just start with any chapter that looks interesting and jump around as you see fit. In this book, you'll find chapters on

advanced collision detection artificial intelligence and steering behaviors isometric projection using the camera and microphone for input 3D and much much more AdvancED ActionScript 3.0 Animation is also more experimental in nature The techniques shown here might not be the best way to do things but they should work well and get you started in your own efforts to achieve a perfect implementation In fact many of the chapters can be seen as introductions to very complex topics that could fill a whole book by themselves Many of these subjects have been extensively covered elsewhere but not necessarily targeted for Flash or ActionScript 3.0 So it took a fair amount of work to pull the data together and get it all working and explain it all clearly in ActionScript This book will inspire you to find out about subjects that you might not have considered before acting as a springboard into your own research into the possibilities of ActionScript 3.0

Runic Amulets and Magic Objects Mindy MacLeod, Bernard Mees, 2006 A fresh examination of one of the most contentious issues in runic scholarship magical or not The runic alphabet in use for well over a thousand years was employed by various Germanic groups in a variety of ways including inevitably for superstitious and magical rites Formulaic runic words were inscribed onto small items that could be carried for good luck runic charms were carved on metal or wooden amulets to ensure peace or prosperity There are invocations and allusions to pagan and Christian gods and heroes to spirits of disease and even to potential lovers Few such texts are completely unique to Germanic society and in fact most of the runic amulets considered in this book show wide ranging parallels from a variety of European cultures The question of whether runes were magical or not has divided scholarship in the area Early criticism embraced fantastic notions of runic magic leading not just to a healthy scepticism but in some cases to a complete denial of any magical element whatsoever in the runic inscriptions This book seeks to re evaluate the whole question of runic sorcery attested to not only in the medieval Norse literature dealing with runes but primarily in the fascinating magical texts of the runic inscriptions themselves Dr MINDY MCLEOD teaches in the Department of Linguistics Deakin University Melbourne Dr BERNARD MEES teaches in the Department of History at the University of Melbourne
