# The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the employees, IT staff, and the employees who will also need to manage it.

The way to build a hybrid work model is to first ask what people want for themselves, and then to build a model that meets those needs.

How do you think about how you should design a hybrid workplace? Are you looking for a hybrid workplace that supports the employees' needs and also meets the requirements of the business?

It's important to be clear on the needs, the most pressing, and how to meet them.
