accomplishments and others however Kuter remains widely underappreciated In Architect of Air Power Brian D Laslie offers the first biography of this important but unsung pioneer whose influence can be found in every stage of the development of an independent US Air Force From his early years at West Point to his days at the Air Corps Tactical School to his leadership role at NORAD Kuter made his mark with quiet efficiency He was an early advocate of strategic bombardment rather than pursuit or fighter aviation fundamentally changing the way air power was used and later helped implement the Berlin airlift in 1948 In what would become a significant moment in military history he wrote Field Manual 100 20 which is considered the Air Force s declaration of independence from the Army Drawing on diaries letters and scrapbooks Laslie offers a complete portrait of this influential soldier Architect of Air Power illuminates Kuter s pivotal contributions and offers new insights into critical military policy and decision making during the Second World War and the Cold War **The Bear Facts** Chris Madson,1994
