The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for.

You want to build a workplace model in which all roles, tasks, and employees work in the way that makes the most sense for them.

How do you know? What data do you need to understand employee preferences? How do you gather the information? How do you use it? How do you ensure that the model is effective for all?
