The Water Radical

Clemens Sonntag

The Water Radical:

The Water Kingdom Philip Ball, 2017-05-05 In *The Water Kingdom* popular science writer Philip Ball navigates the turbulent and often confusing currents of Chinese history and culture by tracing peoples relationships with water from pre historical founding myths to today Water has been an enduring metaphor for philosophical thought and artistic expression in China and from the Han emperors to Mao the ability to manage water became a barometer of political legitimacy Attempts at controlling China s vast waterways has involved engineering works on a scale unmatched the world over for better or worse Yet the strain that economic growth is putting on the country s water resources today may be the greatest threat to China s future In characteristic style Ball delivers an original portrait and as yet unseen cultural history of a country that becomes easier to understand when water is brought to the table [Free-Radical-Induced DNA Damage and Its Repair](#) Clemens

Sonntag, 2006-03-20 The free radical chemistry of DNA had been discussed in some detail in 1987 in my book *The Chemical Basis of Radiation Biology* Obviously the more recent developments and the concomitant higher level of understanding of mechanistic details are missing Moreover in the living cell free radical DNA damage is not only induced by ionizing radiation but free radical induced DNA damage is a much more general phenomenon It was therefore felt that it is now timely to review our present knowledge of free radical induced DNA damage induced by all conceivable free radical generating sources Originally it had been thought to include also a very important aspect the repair of DNA damage by the cell s various repair enzymes Kevin Prise Cancer Campaign Gray Laboratory L don was so kind to agree to write this part However an adequate description of this strongly expanding area would have exceeded the allocated space by much and this section had to be omitted The directors of the Max Planck Institut f r Strahlenchemie now MPI f r Bioanorganische Chemie Karl Wieghardt and Wolfgang Lubitz kindly allowed me to continue to use its facilities after my retirement in 2001 Notably our librarian Mrs Jutta Theurich and her right hand help Mrs Rosemarie Schr er were most helpful in getting hold of the literature I thank them very much Without their constant help this would have been very difficult indeed **Treatise on Water**
