contributors to the building of local security a process by which local residents in the absence of an effective police force develop partner or are at least included in the management of community crimes and other violence They analyze irregular forces dealings with political actors at the community level explaining why and how forces are incorporated in and collaborate with legitimate institutions without using violence against them Offering a new approach to dealing with irregular forces in Southeast Asia contributors explore new theoretical frameworks that are better suited for evaluating irregular forces relationship to different security providers and the political environments in the region Specifically they examine case studies from Indonesia Timor Leste the Philippines and Thailand A valuable resource for researchers students and practitioners in the areas of conflict resolution peacebuilding and security governance especially those with a focus on Southeast Asia This book will also be of great interest to scholars of the sociology and anthropology of the region

**Rehabilitation of Partially Disabled People S.**  
Klosse, 1998 Handicapped and partly disabled workers constitute a major problem from a labour market policy point of view In many European countries governments are puzzled by the question how to favour rehabilitation of these workers Their physical or mental condition does not allow them to enter just every possible job available So this group needs additional attention compared to long term unemployed ethnic minority workers and other groups with an unfavourable labour market position Different countries and within countries different industries and firms seem to be more successful when it comes to reintegration than others This book discusses rehabilitation policies in different European countries and tries to answer the question why some are more and others are less successful In some countries rules and regulations are mostly preventive by nature elsewhere reintegration is the principle goal Countries also differ with respect to the responsibilities of national and local authorities and private companies respectively As the authors do not limit themselves to specific measures but discuss these measures within the broader framework of legal and policy measures regarding disability the study offers interesting insights in what kind of measures are and can be taken in this field Moreover the authors all of them national and international experts with respect to disability arrangements discuss the limits and possibilities of the measures taken in the countries under study
