AATSEEL's Newsletter ,1997 **The Diachronic Typology of Non-Canonical Subjects** Ilja A. Serzant,Leonid Kulikov,2013-11-15 This volume is an important contribution to the diachrony of non canonical subjects in a typological perspective The questions addressed concern the internal mechanisms and triggers for various changes that non canonical subjects undergo ranging from semantic motivations to purely structural explanations The discussion encompasses the whole life cycle of non canonical subjects from their emergence out of non subject arguments to their expansion demise or canonicization focusing primarily on syntactic changes and changes in case marking The volume offers a number of different case studies comprising such languages as Italian Spanish Old Norse and Russian as well as languages less studied in this context such as Latin Classical Armenian Baltic languages and some East Caucasian languages Typological generalizations in the form of recurrent developmental paths are offered on the basis of data presented in this volume and in the literature

Null Subjects in Slavic and Finno-Ugric Gréte Dalmi, Egor Tsedryk, Piotr Ceglowski, 2022-01-19 Even though null subjects have been extensively studied in the past four decades there is a growing interest in partial null subject languages e.g. Finnish and a subtler classification of null subject phenomena overall This volume aims at contributing to this trend focusing on Slavic and Finno-Ugric groups with some extension to Baltic and Samoyedic languages Interestingly these groups offer an impressive array of macro and microvariation Moreover given an increasing interest towards the internal structure of the pronominal elements and the role of various types of topics in the left periphery of the sentence structure the enterprise taken up in this book is to investigate lexical and null referential and generic subjects in order to understand and compare their feature composition licensing conditions and structural properties Rather than trying to squeeze the studied languages into a predefined set of parameters this volume highlights some properties that may lead to a refinement of the existing generalizations It brings together contributors from both generative and typological traditions and will be of interest to any researcher willing to investigate argument drop in a wider crosslinguistic perspective
