**Topics in the Theory of Lifting** Alexandra Ionescu Tulcea,C. Ionescu Tulcea,2012-12-06 The problem as to whether or not there exists a lifting of the  $M^1$  space corresponding to the real line and Lebesgue measure on it was first raised by A Haar It was solved in a paper published in 1931 102 by J von Neumann who established the existence of a lifting in this case In subsequent papers J von Neumann and M H Stone 105 and later on J Dieudonne 22 discussed various algebraic aspects and generalizations of the problem Attempts to solve the problem as to whether or not there exists a lifting for an arbitrary  $M^1$  space were unsuccessful for a long time although the problem had significant connections with other branches of mathematics Finally in a paper published in 1958 88 D Maharam established by a delicate argument that a lifting of  $M^1$  always exists for an arbitrary space of a finite mass D Maharam proved first the existence of a lifting of the  $M^1$  space corresponding to a product  $X \times I$  and a product measure  $\mu \times \nu$  with  $\mu$  a  $\sigma$ -finite measure for all  $E \in \mathcal{E}$  Then she reduced the general case to this one via an isomorphism theorem concerning homogeneous measure algebras 87 88 A different and more direct proof of the existence of a lifting was subsequently given by the authors in 65 A variant of this proof is presented in chapter 4
