

The image features a dense, overlapping grid of numerous small, rounded square thumbnails, each depicting a different scene from a Roblox game. The scenes are diverse, ranging from a city street with cars and buildings to a beach with a palm tree and a car, a character in a blue dress, a character in a red shirt, and various other virtual environments. The thumbnails are arranged in a way that they appear to be floating or scattered across a dark background. In the center of the image, the word "ROBLOX" is written in a large, bold, white, sans-serif font. The letters are slightly shadowed, giving them a three-dimensional appearance as if they are floating above the grid of thumbnails. The overall composition is vibrant and colorful, representing the wide variety of user-generated content available on the Roblox platform.

Defending Assessment Security in a Digital World Phillip Dawson, 2020-10-26 *Defending Assessment Security in a Digital World* explores the phenomenon of cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology. Taking a multi-disciplinary approach, the book develops the concept of assessment security through research from cybersecurity, game studies, artificial intelligence and surveillance studies. Throughout, there is a rigorous examination of the ways people cheat in different contexts and the effectiveness of different approaches at stopping cheating. This evidence informs the development of standards and metrics for assessment security and ways that assessment design can help address cheating. Its new concept of assessment security both complements and challenges traditional notions of academic integrity. By focusing on proactive, principles-based approaches, the book equips educators, technologists and policymakers to address both current cheating as well as future threats.
