Topic: Economics | Words: 295 | Pages: 1

Introduction

In the international trade, countries are obliged to consider the state of industries of their trade partners. Nations whose economies size up to each other have to carefully assess their comparative advantage in order to ensure that they benefit from international deals. Through the example of Japan-US trade relationship, it is possible to understand how a comparative advantage shapes the countries' markets. This paper will analyze the importance of a proper assessment of a nation's and its partner's economy.

The International Trade Between the United States and Japan

International trade presents a complex environment that may be challenging to navigate, especially if there are significant restructures underway. In an attempt to encourage citizens to purchase locally manufactured automobile parts, President Trump was set on decreasing the country's imports through tariffs and quotas (Hufbauer and Jung). However, his assessment lacked a proper evaluation of comparative advantage. The data shows that the U.S. import of automobile parts to Japan is 22.6 times lower than Japan's import to its partner (Hufbauer and Jung). Moreover, the United States did not have an overall comparative advantage, as Japan's imports were significantly higher than its exports of U.S. goods (Hufbauer and Jung). Thus, Trump's threats of increased tariffs were insubstantial and baseless.

Curriculum Investigations Franklin Bobbitt, 1926 **International Relations** Keith L. Shimko, 2007-07. *International Relations: Perspectives and Controversies* offers an innovative approach to this introductory course. Each of the topical chapters covers an enduring and important debate in the field and examines how political actors or political thinkers explain and defend their different opinions. This format offers the students the chance to understand important issues in International Relations as dynamic struggles over resources and power. Each chapter is structured in four parts. The first part provides a historical overview of the issue, its origins, evolution, and current status. The middle two sections of each chapter map out the opposing or contrasting points of view within the debate. These debates are followed by an evaluation of the merits of each position and the scholarly and political assessment of the situation. The goal of the text is to help students think systematically and critically about international affairs. By distilling the discussion from a variety of viewpoints rather than simply providing articles by scholars who disagree, the author highlights meaningful distinctions among differing political positions in a way that helps students understand not only the headlines from today and yesterday but more importantly those from tomorrow. New: The text has been reorganized to present the discussion of power politics in Chapter 3 before the coverage of war and human nature in Chapter 5. New: Expanded coverage of IOs and NGOs includes the European Union as related to security amidst anarchy in Chapter 3 and the role of Amnesty International and other NGOs in human rights activism in Chapter 10. New: Expanded and updated coverage of the Clash of Civilizations in Chapter 12 is found both in the body of the chapter and in the Points of View readings at the end of the chapter. New: Updated Points of View readings which present primary sources such as official foreign policy statements, government documents, news stories, debate transcripts, and editorials expand on the chapter discussions. New topics include: Should We Practice Free Trade in Agriculture? Does Foreign Aid Promote Development? Can a Nuclear Iran be Deterred? and Did 9/11 Reflect a Clash of Civilizations? Marginal glossary.
