The Symposium on Vertical Reference Systems VeReS was initiated on the occasion of the XXII General Assembly of the International Union of Geodesy and Geophysics IUGG Birmingham 1999 by Professor Dr Wolfgang Torge Past President of the International Association of Geodesy IAG and representative of IAG to the Pan American Institute of Geography and History PAIGH The idea was to organise another joint symposium of IAG and PAIGH like the previous one held during the XX IUGG General Assembly at Vienna Austria in 1991 Good reasons for such a joint symposium were the great success and the ongoing activities of the Project on the South American Geocentric Reference System Sistema de Referencia Geocentrico para America del Sur SIRGAS being sponsored by IAG and PAIGH since 1993 The SIR GAS Project Working Group I had presented a continental South American reference frame of 58 stations during the IAG Scientific Assembly at Rio de Janeiro in 1997 This reference frame was already adopted by several South American countries as the basis for their new national horizontal geodetic datums SIRGAS Working Group II To overcome the problems of the heterogeneous vertical height datums between the individual countries SIRGAS had installed its Working Group III Vertical Datum in 1997 As the discussion on the unification of vertical reference systems is also going on in IAG and other bodies of science and practice it was decided to dedicate the symposium to this topic

V Hotine-Marussi Symposium on Mathematical Geodesy

Fernando Sansò, 2013-03-09 Just as in the era of great achievements by scientists such as Newton and Gauss the mathematical theory of geodesy is continuing the tradition of producing exciting theoretical results but today the advances are due to the great technological push in the era of satellites for earth observations and large computers for calculations Every four years a symposium on methodological matters documents this ongoing development in many related underlying areas such as estimation theory stochastic modelling inverse problems and satellite positioning global reference systems This book presents developments in geodesy and related sciences including applied mathematics among which are many new results of high intellectual value to help readers stay on top of the latest happenings in the field

Introduction to Avionics Systems R.P.G.
