Victims And Values:

Victims and Values Joseph A. Amato, David Monge, 1990-11-21 *Victims and Values* joins history and ethics conducting a timely inquiry into conscience and politics. Mindful of William James's notion that ethics must be grounded in the historical situation, this book examines fundamental ambiguities, dichotomies, and contradictions that we experience about the worth of our own suffering and that of others. In particular, it analyzes how victims make a powerful claim upon contemporary conscience and politics. Amato distances himself equally from those who deny suffering all substantive meaning and those who fashionably transform it into self-righteous identities and political rhetorics and ideologies. Amato's hope is that each person will be able to take measure of the suffering of others while still remaining able to value his own suffering. After distinguishing pain from suffering, Amato starts his work with the assumption that humanity must interpret and give meaning to its pains and sufferings. Amato examines the fundamental place of suffering, sacrifice, and victims in Greek and Christian cultures. Reaching the central object of his study, the modern mind, Amato shows how the reformist world view of the eighteenth-century philosopher sought to reduce suffering to a matter of rational calculation and how the progressive views of the nineteenth century dedicated the most profound energies of society and state to the elimination of human suffering. Ironically, in the twentieth century, this resulted in an increasingly hedonistic society that is preoccupied with suffering and its rights, victims, and their claims. Historians, philosophers, political scientists, theologians, and lay people will all find a lively forum in Amato's work.

Getting Incentives Right Robert D. Cooter, Ariel Porat, 2014-02-23 How tort contract and restitution law can be reformed to better serve the social good Lawyers judges and scholars have long debated whether incentives in tort contract and restitution law effectively promote the welfare of society If these incentives

were ideal tort law would reduce the cost and frequency of accidents contract law would lubricate transactions and restitution law would encourage people to benefit others Unfortunately the incentives in these laws lead to too many injuries too little contractual cooperation and too few unrequested benefits Getting Incentives Right explains how law might better serve the social good In tort law Robert Cooter and Ariel Porat propose that all foreseeable risks should be included when setting standards of care and awarding damages Failure to do so causes accidents that better legal incentives would avoid In contract law they show that making a promise often causes the person who receives it to change behavior and undermine the cooperation between the parties They recommend several solutions including a novel contract called anti insurance In restitution law people who convey unrequested benefits to others are seldom entitled to compensation Restitution law should compensate them more than it currently does so that they will provide more unrequested benefits In these three areas of law Getting Incentives Right demonstrates that better law can promote the well being of people by providing better incentives for the private regulation of conduct
