Bridson,2008 With over 5 300 added references this revised and updated edition is an essential source of information for scientists researchers and enthusiastic amateurs The History of Natural History is one of those key works that should be kept in easy reach of anyone interested in the study of natural history in all its branches The Cosmopolitan Interior Judy Neiswander,2008 Judith Neiswander explains that during these years liberal values individuality cosmopolitanism scientific rationalism the progressive role of the elite and the emancipation of women informed advice about the desirable appearance of the home In the period preceding the First World War these values changed dramatically advice on decoration became more nationalistic in tone and a new goal was set for the interior to raise the British child by the British hearth Neiswander traces this evolving discourse within the context of current writing on interior decoration writing that it is much more detached from social and political issues of the day BOOK JACKET

Science Across the European Empires, 1800-1950 Benedikt Stuchtey,2005 The volume investigates how the British French German and Dutch empires influenced or were influenced by scientific exploration as a means Western culture used to gain entry to the non Western world from around 1800 to the middle of the 20th century The transnational perspective aids an understanding and comparison of the sciences as an instrument which the colonial powers employed to gain economic advantage and political control The essays pay tribute to the metropolitan centre and colonial periphery viewpoints and to the different ways in which imperial expansion occurred Science had specific meanings in the specific historical realities of European colonialism the European case studies present similarities and differences in their imperial systems and in the way in which science was used in relation to the level at which they interacted intellectually with the indigenous populations
