Welfare Capitalism In Southeast Asia:

Welfare Capitalism in Southeast Asia M. Ramesh, Mukul G. Asher, 2000-02-11 This is the only in depth study of social policies in Southeast Asia It compares social security health and education policies in Indonesia Malaysia the Philippines Singapore and Thailand After describing the policies and assessing their adequacy and equity implications it examines the forces that have shaped them It concludes that social programs except for primary education in the region are both inadequate and inequitable It argues that the reason for this is political rather than cultural or socio economic *Welfare Capitalism in East Asia* I. Holliday, P. Wilding, 2003-09-18 Social Policy has been a key dimension of dynamic economic growth in East Asia's little tigers and is also a prominent strand of their responses to the financial crisis of the late 1990s This systematic comparative analysis of social policy in the region focuses on the key sectors of education health housing and social security It sets these sectoral analyses in wider contexts of debates about developmental states the East Asian welfare model and globalization

Model of Welfare Capitalism? United States Rubber Company in Southeast Asia, 1910-1942 Shakila Yacob, 2004 **Model of Welfare Capitalism? The United States Rubber Company in Southeast Asia, 1910-1942** Shakila Yacob, 2010 Welfare capitalism the management ethos adopted by American business leaders in the early twentieth century emphasizes the role of business rather than trade unions or government in taking care of its workers This article focuses on the reasons why the United States Rubber Company USRC one of the four largest U S rubber manufacturers promoted welfare capitalism at its rubber plantations on the east coast of Sumatra and Malaya between 1910 and 1942 In addition this study assesses the development of USRC's system of welfare in the areas of housing profit sharing pension plans health care and recreation This article argues that USRC's intention was not to forestall unionization the intention of U S based companies in adopting welfare capitalism as union formation in Southeast Asia during that period was very unlikely but to overcome labor shortages and high turnover rates and to ensure labor stability With reduced labor costs the availability of financial resources allowed for technical innovations and Ramp D which ultimately would lead to increased productivity

A Handbook of Comparative Social Policy Patricia Kennett, 2006-01-01 Kennett has made a major contribution to the comparative study of social policy The book will undoubtedly serve as a major resource for social policy scholars and the editor is to be commended for taking on what must have been a Herculean task It is to be hoped that the book will be available in many university libraries It deserves to be widely consulted not only by those interested in international issues but by anyone concerned with the challenges facing the academic field of social policy today *Journal of Sociology and Social Welfare* This volume makes a heroic effort to transform the abstractions floating around in the literature on comparative social policy research into a more grounded discussion of what the policy controversies are all about The contributions in the book climb down the ladder of abstraction which asserts that context institutions and globalization all count and that the public private discourse has changed The book attempts to specifically show how these abstractions

matter in recent social policy practice and research Martin Rein Massachusetts Institute of Technology US The current context of social policy is one in which many of the old certainties of the past have been eroded The predominantly inward looking domestic preoccupation of social policy has made way for a more integrated international and outward approach to analysis which looks beyond the boundaries of the state It is in this context that this Handbook brings together the work of key commentators in the field of comparative analysis in order to provide comprehensive coverage of contemporary debates and issues in cross national social policy research Organized around five themes this impressive volume explores the contextual conceptual analytical and processual aspects of undertaking comparative social research In the first part the authors are concerned with de centring the state and extending the epistemological framework through which cross national analysis is explored In Parts II and III the focus is on the conceptual and theoretical frameworks for analysing social policy cross nationally while Part IV examines the day to day reality of preparing for and carrying out cross national analysis In the final section the authors highlight continuing and emerging themes and issues which are of particular relevance to understanding the contemporary social world International in scope this authoritative Handbook presents original cutting edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative social research It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy sociology politics urban studies and public policy

Culture, Identity, and Religion in Southeast Asia Alistair D. B. Cook, 2007 I have read the draft of this book sent to me by the editor After reading this draft I do think this book is valuable and timely It discusses the contemporary issues that have worried many people in the present world terrorism human rights Islamic radicalism and the problem of identity in the Singaporean capitalism These issues are not discussed in the theoretical abstract way it also doesn't mean that theories are not discussed at all but in the context of various concrete societies The book deals with one of the above issues in Malaysia Singapore and Indonesia Aceh and Sumenep in Madura Each issue is written by a different author that has studied the issue thoroughly So the book is a collection of research done by specialists of these issues Two essays on Southeast Asia one on health and the other on human security give the general picture of this region acting as a broad introduction of the chapters that follow Each chapter has been written professionally and the readers will learn many things from each of them One has to read the chapter in order to really appreciate them Therefore I really recommend that this manuscript to be published as a book in order to get a large audience One shortcoming though this book deals with three countries only Malaysia Singapore and Indonesia albeit these three are the important countries in the region Other important Southeast Asian countries such as Thailand the Philippines and Burma are not discussed individually With the omission of these countries it thus can be argued whether this book can

represent the Southeast Asian region Also in dealing with Indonesia the chapters talk on sub national level namely on Aceh province and a peripheral city Sumenep in the island of Madura East Java while Malaysia and Singapore are dealt on the level of nation state To conclude even with these shortcomings this book is still valuable Therefore I would like to recommend it be published Arief Budiman Foundation Professor of Indonesian Asia Institute The University of Melbourne Australia

Social Security in the ASEAN M. Ramesh,1995 **Asian States** Richard Boyd,Tak-Wing Ngo,2005-01-26 A team of international leading experts provide a much needed re examination of the theoretical claims and the empirical foundation of developmental state theory Asian States argues that regardless of the merits of the developmental state as an explanation of economic growth it falls far short of being an adequate theory of the state in Asia The contributors critically review claims about agency state society and state market relations that shape developmental projects It broadens the analysis of state involvement in developmental projects and considers the variety of political and social bases for state projects across East and Southeast Asia in a theoretically sensitive thematic and empirically rich way **Social Policy Review 25** Ramia,

twenty years a large scale bottom up privatization has taken place in Vietnam changing and dismantling the public health care system This process has led to severe tensions inherent in the transitional society of Vietnam between equity and access to health care support especially for the poor elderly migrants and ethnic minorities on the one hand and its efficiency on the other hand The book traces the reform efforts to modernize the health care system by the Communist Party of Vietnam and the Vietnamese government The author bases her findings on little known primary literature and interviews with key stakeholders of the policy network involved in the reform of the health care system thereby painting an authentic atmospheric picture of the profound changes in the health care system in Vietnam
