Welfare Research Fiona Williams, Jennie Popay, Ann Oakley, 1999 First published in 1998 Routledge is an imprint of Taylor Francis an informa company *Welfare Research*, 1998 [A Critical Review of Child Welfare Research](#) Judith A. Jensen, 1968 *Remaking Community?* Andrew Wallace, 2016-03-23 New Labour deployed community as a conceptual framework to rearticulate the state citizen relationship to be enacted at and through new spaces of governance An important example of this was how successive New Labour governments sought to renovate the social political and economic cultures of poor neighbourhoods and generate trajectories of strong empowered and ordered civic space This was pursued through programmes such as the New Deal for Communities NDC that sought to invigorate and embed socially excluded citizens within localised regeneration projects In attempting to construct community as a space through which personal and spatial renewal could be achieved New Labour relied on problematic assumptions about the nature scope and meaning of community and its relationship with individual social agents Drawing on original research conducted in an NDC neighbourhood *Remaking Community* addresses the interlinking uses of community in government rhetoric and practice It explores why this concept was so central to the New Labour governing project and what it meant for individuals enveloped in the regeneration of their citizenship and locality It seeks to understand how community is conceptualised applied constructed misunderstood exploited experienced contested mobilised and activated by both policy actors and neighbourhood residents and situates this discussion within an examination of the political emotional and cultural impact of the regeneration experience Offering a timely analysis of New Labour regeneration and the politics of community this book makes an original and important contribution to debates around new spaces of governance citizen participation and the tackling social exclusion in poor neighbourhoods [The SAGE Handbook of Social Work Research](#) Ian Shaw, Katharine Briar-Lawson, Joan Orme, Roy Ruckdeschel, 2009-11-27 This is an ambitious book It aims at nothing less than a comprehensive account of the state of the art of social work research internationally and an intellectually original statement that will help to define and shape social work research Those with a serious interest in social work research will agree that this is a major undertaking and one that should put social work research on the map Ian Sinclair University of York UK This terrific Handbook provides an essential map for navigating the complex currents of social work research today It resists polemical and simplistic binaries to chart a course that emphasizes diversity pluralism and sensitivity to political contexts in many featured exemplars As key chapters note inherent tensions at the heart of social work itself are mirrored in current debates about the purposes and methods of social work research Rather than patch over differences the volume invites us to understand historical roots of unresolvable tensions and live with them The international scope of the volume is unique scholars from more than a dozen different countries were involved and its broad scope counters the tendency toward parochialism of much North American literature The Handbook should be essential reading for students and academics Catherine Riessman Boston University USA

The SAGE Handbook of Social Work Research provides a comprehensive internationally focused account of leading social work research offering an original and defining statement on contemporary theory and practice within the field. The groundbreaking Handbook engages critically with the nature and role of social work research and evaluation in contemporary societies around the globe and asks four key questions: What is the role and purpose of social work research? What contexts shape the practice and purpose of social work research? How can we maximise the quality of the practice of social work research? How can the aims of social work in its varied domains be met through social work research? Ranging over local, national and international issues and exploring questions of theory and practice, this is a diverse and constructively organized overview of the field. It will quickly be recognized as a benchmark in the expanding field of social work research, setting the agenda for future work in the arena.

From transmitted deprivation to social exclusion Welshman, John, 2007-09-13. John Welshman's new book fills a major gap in social policy: the history of debates over transmitted deprivation and their relationship with current initiatives on social exclusion. The book explores the content and background to Sir Keith Joseph's famous cycle of deprivation speech in 1972, examining his own personality and family background, his concern with problem families and the wider policy context of the early 1970s. Tracing the direction taken by the DHSS SSRC Research Programme on Transmitted Deprivation, it seeks to understand why the Programme was set up and why it took the direction it did. With this background, the book explores New Labour's approach to child poverty initiatives such as Sure Start, the influence of research on inter-generational continuities and its new stance on social exclusion. The author argues that while earlier writers have acknowledged the intellectual debt that New Labour owes to Joseph and noted similarities between current policy approaches to child poverty and earlier debates, the Government's most recent attempts to tackle social exclusion mean that these continuities are now more striking than ever before. Making extensive use of archival sources, private papers, contemporary published documents and oral interviews with retired civil servants and social scientists, *Policy, Poverty and Parenting* is the only book-length treatment of this important but neglected strand of the history of social policy. It will be of interest to students and researchers working on contemporary history, social policy, political science, public policy, sociology and public health.

Handbook of Youth and Young Adulthood Andy Furlong, 2009-06-02. The parameters within which young people live their lives have changed radically. A Critical Review of Leadership Concepts and Research Peter Watkins, 1986 This monograph critiques the literature on organizational and educational leadership asserting that traditional approaches are unsatisfactory in their own right and within the existing positivist functionalist paradigm After outlining problems in defining leadership the paper critically examines the trait approach particularly Stogdill s Investigation of 124 papers studying leaders personality characteristics Stogdill s findings base leadership not on traits but on situational variables According to this monograph the situational approach viewing leadership in terms of functions did not clarify what is actually entailed in leadership The same holds true for the authoritarian democratic continuum and Fiedler s contingency model of leadership The latter theory is criticized for presenting followers as ciphers without human volition Leadership literature is faulted for avoiding basic questions of class inequalities of power and hierarchical control and ideology In reality leadership theory has stressed control and manipulation of the organizational community according to the administrator s whims Finally

two alternative views are presented The first stresses the importance of class power and human agency in educational administration The second presents leadership as a dialectic relationship in the social construction of reality These alternative approaches may be seen in a new emphasis on participative management in Victoria Australia schools Appended are 112 references 3 readings and an annotated bibliography of 15 references MLH
