Styran, Robert Taylor, 2012-03-22 In *This Great National Object* Roberta Styran and Robert Taylor the unparalleled experts on the subject recount the story of the canals with particular emphasis on the experiences of the engineers contractors and labourers who built the inland waterways between 1824 and 1889 Making extensive use of the National Archives and the Archives of Ontario Styran and Taylor unveil previously unpublished information about the construction of the canals including technical plans and drawings from a wide variety of sources They illustrate the technical and management intricacies of building a navigational trade and commerce lifeline while also revealing the vivid characters from businessman William Hamilton Merritt to engineer John Page who inspired the project and drove it to completion The history of the Welland Canals is a gripping tale of epic proportions Given the ongoing importance of the Great Lakes in the North American economy interest in the St Lawrence Seaway of which the Welland is the Great Swivel Link and the relevance of labour history This Great National Object will be of interest to enthusiasts and historians alike

History of the Niagara Peninsula and the New Welland Canal A. E. Coombs, 1930

The Welland Canals and their Communities John Jackson, 2019-11-21 For over 170 years the Welland Canals have been a major industrial catalyst and an important agent of urban evolution spawning a series of distinct communities along the length of the canals between Lake Erie and Lake Ontario Four Welland canals have crossed Southern Ontario s Niagara Peninsula since 1829 and each update fostered a renewed economic expansion The most recent change came in 1959 when the new St Lawrence Seaway system opened the canal and the Niagara Peninsula to the Atlantic Ocean *The Welland Canals and Their Communities* is an in depth examination of the history and influence of each canal It traces the changes over time in engineering elements such as the canal route its water supply and flow and its form including locks weirs bridges and other structures that have successively modified both the landscape and drainage pattern of its regional surroundings In addition to these marine elements John N Jackson looks at the movements of vessels the changing types of ships that have used the canal and the economic character of trading flows within and through the canal to provide a detailed portrait of the interaction between transportation and land use at both the local and regional level The changing canal scene and the evolution form and character of the canal communities provide the dual emphasis of Jackson s narrative which concludes with an appreciation of the canal system and its potential at a time when heritage and tourist concerns rise to the fore across the Niagara Peninsula
