Perspectives on Ecosystem Management for the Great Lakes Lynton K. Caldwell,1988-07-08 In 1978 Canada and the United States concluded an agreement for the protection and enhancement of water quality in the Great Lakes based on the ecosystem approach to management Since ratification of this agreement little progress has been made in practical application of this concept to basin wide management for the Great Lakes At the same time public concern for the quality of the Great Lakes and their future has risen dramatically As a result the need has arisen for a practical authoritative explanation of the ecosystem concept This volume written by highly qualified authorities addresses these important ecological political and economic issues in a systematic and informative manner In this study the ecosystem concept and its objectives are defined The institutional structure that has evolved for governance of the Great Lakes the need for a more effective governance structure and prospects for rehabilitation of the Great Lakes Waters are crucial issues considered The management question is the single most important policy question with respect to the Great Lakes and this is the only study available that brings together all pertinent information and provides steps for new and constructive management of the Great Lakes
