unintended consequences how a technique originally created to minimize market risk spiraled into a multi trillion dollar game with unparalleled risks Having founded and sold a firm that changed the world Goodkin left New York to travel and play backgammon only to return to found another groundbreaking firm Numerix a software company that substituted computational physics for econometrics to better manage derivative risk The story of the computerization of Wall Street by the man at the helm Packed with keen insights based almost entirely on poker backgammon and game theory Goodkin s unique insight to the markets is that everyone has the wrong answers The solution is not to try to beat the market but to come up with the wrong answers faster The epic tale of the untold story how one man with a great idea decided not to play the market but to revolutionize the financial world for generations to come by creating the most ground breaking tool for market players since the ticker tape
