The College Racket:

The College Racket Andrew L. Simon,2000 A survey of career choices in America Undergraduate colleges appear to be indifferent as to the real value of the degrees given Less than 20% of American graduates took a single course in physics Leftist indoctrination is rampant at the top colleges General Price List ... Whiteley, William, Ltd., London,1913 **We Are Doomed** John Derbyshire,2010-10-05 To his fellow conservatives John Derbyshire makes a plea Don t be seduced by this nonsense about the politics of hope Skepticism pessimism and suspicion of happy talk are the true characteristics of an authentically conservative temperament And from Hobbes and Burke through Lord Salisbury and Calvin Coolidge up to Pat Buchanan and Mark Steyn in our own time these beliefs have kept the human race from blindly chasing its utopian dreams right off a cliff Recently though various comforting yet fundamentally idiotic notions of political correctness and wishful thinking have taken root beyond the Kumbaya singing we re all one crowd These ideas have now infected conservatives the very people who really should know better The Republican Party has been derailed by legions of fools and poseurs wearing smiley face masks Think rescuing the economy by condemning our descendents to lives of spirit crushing debt Think nation building abroad while we slowly disintegrate at home Think education and No Child Left Behind But don t think about it too much because if you do you ll quickly come to the logical conclusion We are doomed Need more convincing Dwell on the cheerful promises of the diversity cult and the undeniable reality of the oncoming demographic disaster Contemplate the feminization of everything or take a good look at what passes for art these days Witness the rise of culturism and the death of religion Bow down before your new master the federal apparatchik Finally ask yourself How certain am I that the United States of America will survive in any recognizable form until say 2022 A scathing mordantly funny romp through today s dismal and dimmer political and cultural scene We Are Doomed provides a long overdue dose of reality revealing just how the GOP has been led astray in recent years and showing that had conservatives held on to their fittingly pessimistic outlook America s future would be far brighter Ladies and gentlemen it s time to embrace the Audacity of Hopelessness

Schwartz,2018-09-15 The twenty million students now pursuing higher education in America are paying more than history culture and the consumer price index can possibly justify while the product they are purchasing is one that has become systematically debased General education has been depreciated core curricula eroded expectations at all levels reduced Slightly above half of the currently enrolled students are graduating and only half of those are finding employment commensurate with what was once understood to be an authentic college education Many are saddled with crippling debt a particularly cruel reality for those who are unemployed or underemployed and unable to remove their debts via bankruptcy Commentators now refer to the college campus as a country club or a daycare facility one that is populated by a host of

counselors tutors and hand holders who serve an often unprepared or underprepared student body Remedial courses are commonplace even with the systematic reduction of expectations Among competing nations international tests place our 15 year olds no higher than 19th in three critical categories Many now speak of K 16 education as our colleges replicate the atmosphere and behaviors of our grammar and high schools How did we reach this point How did the erosion of faculty and curricular authority occur within our institutions of higher learning What roles were played by the radical students of the 1960s How did our colleges of education contribute to the problem How did corporatist administrators replace academic leaders and leverage ideologies to extend bureaucracy attract and secure tuition dollars at any intellectual cost and create self serving career paths for individuals running across the cracking ice of ineptitude and a lack of personal commitment Most important how can we reverse this process recapture the relevant strengths of past practices escape the gray vocationalism we now encounter at every turn and return to principles and standards that can legitimately be termed authentic How can we save the previously marginalized students who suffer the most within the current system These are the questions posed by this book

Fairbanks, Richard J. Zeckhauser, 2004-12-30 Each year hundreds of thousands of high school seniors compete in a game they will play only once whose rules they do not fully understand yet whose consequences are enormous The game is college admissions and applying early to an elite school is one way to win But the early admissions process is enigmatic and flawed It can easily lead students toward hasty or misinformed decisions This book based on the careful examination of more than 500 000 college applications to fourteen elite colleges and hundreds of interviews with students counselors and admissions officers provides an extraordinarily thorough analysis of early admissions In clear language it details the advantages and pitfalls of applying early as it provides a map for students and parents to navigate the process Unlike college admissions guides *The Early Admissions Game* reveals the realities of early applications how they work and what effects they have The authors frankly assess early applications Applying early is not for everyone but it will improve sometimes double even triple the chances of being admitted to a prestigious college An early decision program can greatly enhance a college's reputation by skewing statistics such as selectivity average SAT scores or percentage of admitted applicants who matriculate But these gains come at the expense of distorting applicants' decisions and providing disparate treatment of students who apply early and regular admissions The system in short is unfair and the authors make recommendations for improvement *The Early Admissions Game* is sure to be the definitive work on the subject It is must reading for admissions officers guidance counselors and high school seniors and their parents

the strategic choices that await those seeking to enroll at the nation's leading colleges and universities. It can help a student decide whether when and why to apply early. Most important, it can give applicants the confidence to focus less on the game and more on the truly critical factors in choosing a college: the level of intellectual challenge and vitality in the curriculum, the strength and accessibility of the faculty, and the student's individual sense of fit with a particular campus environment and culture.

Nancy Vickers, President Bryn Mawr College, *The Early Admissions Game* explains clearly and comprehensively the many forces that have made early applications a prominent and much misunderstood feature in the high-pressure arena of college admissions. The authors clear away the hype and speculation, then offer refreshingly sane, sensible guidance that will greatly help students make intelligent decisions about their college applications.

William D. Wharton, Headmaster Commonwealth School, Boston; Avery Fairbanks and Zeckhauser offer clear and compelling evidence that the college admissions process needs repair. Their findings have already inspired steps toward reform.

Richard Levin, President Yale University, "This is an exceptionally interesting and intelligent book, one with real news to report. The authors present their important findings with great clarity. I expect that this volume will have a significant and favorable impact on policy discussion of early admission programs at elite colleges."

Michael McPherson, President Macalester College, "Anyone involved in the college admissions process—students and parents, counselors and admissions officers, top officials at high schools and at colleges—should read this important book. It will help them achieve their objectives. The authors also present a number of suggestions for reforms in the admissions system that are worthy of debate across American higher education."
