Toolkit Circular Economy

Yicheng Fang

Toolkit Circular Economy:

The Routledge Handbook of Waste, Resources and the Circular Economy Terry Tudor, Cleber J.C.

Dutra, 2020-12-27 The Handbook introduces, contextualises, critiques and discusses a range of perspectives associated with the concept of the circular economy. These perspectives span an array of subjects including economics, environmental policymaking, sociology, environmental science, environmental and industrial engineering, management, international development and human geography. A fundamental underpinning of the Handbook is that it takes account of a wide range of sectors as well as geographical perspectives that incorporate both a Global North and Global South world context. This approach is crucial because it is only within such a holistic perspective that the circular economy concept can truly be examined. In addition, these issues are examined both from a theoretical as well as a practical perspective using real world case studies for illustration. Given its wide subject, sectoral and geographical areas of focus, the Handbook should be of value not only for those undertaking research in the field of circular economy but also stakeholders involved in policymaking as well as decision making on the front line.

EcoDesign and Sustainability II Yusuke Kishita, Mitsutaka Matsumoto, Masato Inoue, Shinichi Fukushima, 2020-11-10 This book highlights cutting edge ecodesign research covering product and service design, smart manufacturing and social perspectives in ecodesign. Featuring selected papers presented at EcoDesign 2019 11th International Symposium on Environmentally Conscious Design and Inverse Manufacturing, it also includes diverse interdisciplinary approaches to foster ecodesign research and activities. In the context of Sustainable Development Goals (SDGs), it addresses the need for the manufacturing industry to design innovations for sustainable value creation, taking into account technological developments, legislation and consumer lifestyles. Further, the book discusses the concept of circular economy, which originated in Europe and aims to increase resource efficiency by shifting away from the linear economy. Focusing on product life cycle design and management, smart manufacturing, circular economy and business strategies, and providing useful approaches and solutions to these emerging concepts, this book is intended for both researchers and practitioners working in the broad field of ecodesign and sustainability.

Circular Economy Aldo Alvarez-Risco, Subramanian Senthilkannan Muthu, Shyla Del-Aguila-Arcentales, 2022-04-02 This book highlights ways to evaluate circular economy using global standard and footprints, the way global firms are using to ensure the measurement of the impact. It presents various case studies from different sectors with the efforts made to contribute to circular economy and at the same time its contribution to minimize carbon and water footprints.

Delivering the Circular Economy, 2015

Sustainable Design and Manufacturing 2014 Part 1 R. Setchi, R.J. Howlett, M. Naim, H. Seinz, [Global Environment Outlook - GEO-6: Healthy Planet, Healthy People](#) UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human

health By bringing together hundreds of scientists peer reviewers and collaborating institutions and partners the GEO reports build on sound scientific knowledge to provide governments local authorities businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050 GEO 6 outlines the current state of the environment illustrates possible future environmental trends and analyses the effectiveness of policies This flagship report shows how governments can put us on the path to a truly sustainable future emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people This title is also available as Open Access on Cambridge Core

Creating a Roadmap Towards Circularity in the Built Environment Luís Bragança, Meri Cvetkovska, Rand Askar, Viorel Ungureanu, 2023-12-06 This open access book summarizes the research being pursued as part of the COST Action CA21103 titled Implementation of Circular Economy in the Built Environment Circular B which aims to define the methodology to develop a common circularity framework for inclusive application and assessment in new and existing buildings to support decision making for all value chain stakeholders and appraise the implementation level of the European Circular Economy Action Plan CEAP The Action is increasingly gaining interest worldwide bringing multidisciplinary young and experienced researchers together to share the latest studies and develop new knowledge Consisting of 17 chapters corresponding to the conference themes the book analyses and discusses topics such as Circular Economy CE best practices design strategies for circular buildings circular materials and products adaptive reuse of existing buildings recovery and reuse of salvaged materials and products case studies of current applications and trends barriers against CE implementation in buildings efficient waste and circular resource management circular lifecycle management and decision making stakeholders relationships CE supporting policies and barriers circular business models criteria KPIs and assessment models for circular buildings CE criteria in sustainability frameworks digitalization and BIM for enhanced circularity of buildings and building materials and standardization of CE definitions in buildings Circular Economy Sadhan Kumar Ghosh, Gev Eduljee, 2023-10-13 Sustainability from an economic and environmental perspective is linked to the way we extract and consume the earth's finite resources and is implicit in the definition of a circular economy CE as a model of production and consumption designed to retain value within the economic system This can include conserving natural resources making sustainable products by incorporating recyclability in product design changing consumption behaviour and adopting more sustainable business models The UN Sustainable Development Goals SDGs are a set of objectives for improving health and education reducing inequality and protecting our shared environment globally The CE is a key enabler to achieving these objectives The Circular Economy explores how the concepts of CE can help address and meet targets linked to the SDGs Taking a broad view across different industries and areas and looking at specific SDGs this book discusses current activities standards policy and legislation challenges to achieving the SDGs and opportunities for enhancing circularity and sustainability Sustainability Certifications, Labels and Tools in the Built Environment Francesco Asdrubali, Umberto

Berardi,2025-06-30 This book is aimed at covering all aspects of the evaluation certification and reduction of the energy and carbon footprint of the built environment from the scale of the city and its neighbourhoods to the building level and finally to the level of single building materials and components Many protocols tools and labels have been proposed in recent years both at international and local levels and the aim of the book is to classify describe and discuss all the different approaches and options The chapters offer a comprehensive up to date and critical review of all the different certification methods that have been proposed at different levels in the building sector The first chapter introduces the topic and its importance providing data on the impact of the building sector and the construction industry The following chapters are dedicated respectively to tools and protocols for cities and neighbourhood sustainability assessment tools and protocols for buildings sustainability assessment and certification and for building materials and components Finally this book includes an overview of the legislation and standards in the field and case studies to exemplify the application of the different tools and labels This is a key reference for decision makers researchers scholars students and professionals approaching research and work in the field of energy and environmental impact of the building sector be they engineers architects planners owners developers or facility managers

The Circular Business Revolution Julia Binder, Manuel Braun, 2024

Positive Finance Hervé Guez, Philippe Zaouati, 2017-09-08 For some finance is the enemy solely responsible for the global financial crisis and symbolic of an outdated model that is catapulting us toward social and ecological ruin Such a view can seem tempting The 2007 2008 meltdown of the financial system was intimately bound to the financialization of the economy and its consequences However in reality the crisis in finance is an indicator that our economic model is obsolete It is possible to imagine another way which would consist of seeing finance as a toolkit for building a solution to the crisis Positive Finance presents a way to transform the economic model and reduce the ever widening gulf of inequality while taking into account environmental constraints In order to achieve this the authors argue that we must re envision the allocation of capital in order to support social and technological innovations to design and build sustainable infrastructure and to finance the energy transition Reinvented finance could become a powerful lever for setting these transformations in motion This book is dedicated to proving that such leverage is within reach here the authors present a toolkit for putting money to work in the general interest

American Machinist, 1930

Sustainability Fundamentals Jad Dellel, 2025-10-02 The world of sustainability has changed Is your knowledge up to date When the first edition of Sustainability Fundamentals was published in 2020 it was a simple guide to a complex topic Today sustainability is at the center of the global economy ESG has moved from the margins to the mainstream the urgency of climate change has intensified and a new green economy is booming This completely revised and expanded second edition is the one book you need to navigate this new reality Written by a project management professional and sustainability expert this guide cuts through the noise to give you a clear actionable and up to date foundation Inside you will learn to Grasp the Core Principles Understand the essential Three Pillars of sustainability People Planet Profit Decode the Modern Business Case Articulate the value of sustainability using the ESG framework that investors demand Identify Key Global Trends Recognize the major forces from decarbonization to the circular economy shaping our future Spot Greenwashing Gain a practical toolkit to identify misleading environmental claims and become a more informed consumer Chart Your Career Path Discover the skills and educational pathways needed to build a career in the green economy Glimpse the Next Frontier Understand the transformative potential of AI in accelerating sustainability solutions Whether you are a student a professional looking to pivot or a leader tasked with implementing a new strategy this book is your essential first read It replaces complexity with clarity providing the foundational knowledge you need to speak confidently act decisively and become an architect of a more sustainable tomorrow
