

# TOTAL REWARD

## Student's Book 2

### COMPONENTS

**Total Reward** is a three-level course designed to take teenage learners from their first introduction to English up to Intermediate level.

**Total Reward** offers clear presentation and thorough practice of English through topics which teenagers will find interesting and relevant.

The three levels are designed to ensure smooth and rapid progress through a core English programme dealing with essential grammar points, systematic vocabulary and skills development, as well as regular progress checks.

The Practice books and extra texts in the Teacher's book are used to recycle and consolidate vocabulary and grammar, and to encourage skills development.

The books are clear and easy to use, with each lesson presented across a double-page spread.

Key features of **Total Reward** Student's Book include:

- ◆ grammar syllabus covering the essential language at this level
- ◆ controlled vocabulary development
- ◆ topics designed for teenage learners
- ◆ integrated skills work
- ◆ variety of text and dialogues

Peter Pirolli,2009 Although much of the hubris and hyperbole surrounding the 1990 s Internet has softened to a reasonable level the inexorable momentum of information growth continues unabated This wealth of information provides resources for adapting to the problems posed by our increasingly complex world but the simple availability of more information does not guarantee its successful transformation into valuable knowledge that shapes guides and improves our activity When faced with something like the analysis of sense making behavior on the web traditional research models tell us a lot about learning and performance with browser operations but very little about how people will actively navigate and search through information structures what information they will choose to consume and what conceptual models they will induce about the landscape of cyberspace Thus it is fortunate that a new field of research Adaptive Information Interaction AII is becoming possible AII centers on the problems of understanding and improving human information interaction It is about how people will best shape themselves to their information environments and how information environments can best be shaped to people Its roots lie in human computer interaction HCI information retrieval and the behavioral and social sciences This book is about Information Foraging Theory IFT a new theory in Adaptive Information Interaction that is one example of a recent flourish of theories in adaptationist psychology that draw upon evolutionary ecological theory in biology IFT assumes that people indeed all organisms are ecologically rational and that human information seeking mechanisms and strategies adapt the structure of the information environments in which they operate Its main aim is to create technology that is better shaped to users Information Foraging Theory will be of interest to student and professional researchers in HCI and cognitive psychology
