Field & Stream , FIELD STREAM America s largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations *Tule Elk* Caroline Arnold,2012-10-01 Grade 3 6 Another informative appealing book in the series this one is about the smallest American elk at one time almost extinct Arnold describes the elks life span habitat food enemies and reproduction The large full color photographs extend and clarify the text such as pictures of the elk during mating season and of one hiding a new born elk in the grass This book concentrates on the one kind of elk and has more illustrations than Ahlstrom s *The Elk Crestwood* 1985 but as much of the information is the same purchase will depend the need for information on elk For libraries that don t have the Ahlstrom book Arnold s is by far the superior choice Margaret C Howell West Springfield Elem Sch VA **Fish and Wildlife Miscellaneous** United States. collared elk cows between 2005 and 2008 to examine herd structures space use patterns grouping behavior and survival rates of tule elk Radio telemetry data revealed 6 herds of elk at Pt Reyes 4 at Tomales which had distinct herd ranges and showed little spatial interaction Fixed kernel home ranges were some of the smallest for elk in North America 217 ha SE 35 and were negatively correlated with elk density Home range sizes were 300% smaller than previous estimated for elk at Pt Reyes in 1998 The sizes of elk groups peaked during the winter and mid summer and were smallest during the spring parturition and fall rutting periods Elk with larger home range sizes generally formed smaller groups Resource selection function RSF results indicated that tule elk at Pt Reyes selected flat grassland dominated habitats over hilly scrub and forest habitats although resource selection patterns varied among herds Elk shifted to lower elevations steeper slopes and more scrub dominated habitats during the dry season May October Most elk showed an aversion to areas close to roads and trails but this result was not consistent across all herds I quantified small scale movement patterns of tule elk using hourly fixes from GPS collared elk Elk exhibited daily cycles in their movement patterns by increased their hourly movements in the morning and evening hours Elk daily movements were longest during wet spring months and shortest during the dry fall months Elk slowed when traveling through homogeneous grassland habitat Windy conditions caused elk to slow but precipitation had no effect on elk movement Elk moved faster when closer to roads and trails Elk in higher density herds moved slower on an hourly scale than lower density herds but herd density had no affect on daily movement patterns Using known fate models applied to radio telemetry data I estimated annual cow elk survival was 0.96 SE 0.02 I captured and monitored radio collared elk calves from 2005 to 2007 to estimate calf survival and causes of mortality Using known fate models I estimated annual survival for elk calves was 0.81 SE 0.02 The primary cause of death for both cows and calves was starvation which was often accompanied by copper and selenium deficiencies Sensitivity and elasticity estimates of elk vital rates revealed that adult cow elk survival contributed the most 30% to elk annual population change λ The D Ranch and Limantour herds were expected irruptive growth and by 2018 increase to 393 and 389 elk respectively based on stochastic population projection models The projected future abundance of elk in the Tomales herds was dependant on the previous year s annual rainfall models projected increases in elk abundance following years of above average rainfall but no change in elk abundance following years of below average rainfall Future growth of the D Ranch and Limantour elk herds will likely concentrate on adjacent ranchlands given RSF models results and will likely result in future conflicts between NPS management unless proactive actions are taken
