**Turning Learning Right Side Up** Russell L. Ackoff, Daniel Greenberg, 2008-06-03 In the age of the Internet we educate people much as we did during the Industrial Revolution We educate them for a world that no longer exists instilling values antithetical to those of a free 21st century democracy Worst of all too many schools extinguish the very creativity and joy they ought to nourish In *Turning Learning Right Side Up* legendary systems scientist Dr Russell Ackoff and in the trenches education innovator Daniel

Greenberg offer a radically new path forward In the year s most provocative conversation they take on the very deepest questions about education What should be its true purpose Do classrooms make sense anymore What should individuals contribute to their own education Are yesterday s distinctions between subjects and between the arts and sciences still meaningful What would the ideal lifelong education look like at K 12 in universities in the workplace and beyond Ackoff and Greenberg each have experience making radical change work successfully Here they combine deep idealism with a relentless focus on the real world and arrive at solutions that are profoundly sensible and powerfully compelling Why today s educational system fails and why superficial reforms won t help The questions politicians won t ask and the answers they don t want to hear How do people learn and why do they choose to learn Creating schools that reflect what we know about learning In a 21st century democracy what values must we nurture and why aren t we nurturing them How can tomorrow s ideal schools be operated and funded A plan that cuts through political gridlock and can actually work Beyond schools building a society of passionate lifelong learners Learning from childhood to college to workplace through retirement Reinventing Learning for the Next Century How We Can and Why We Must An extraordinary conversation about the very deepest questions Today what is education for Where should it take place How When What is the ideal school The ideal lifelong learning experience Who should be in charge of education And who pays for it all Over the past 150 years virtually everything has changed except education Schools were designed as factories to train factory workers The factories are gone but the schools haven t changed It s time for us to return to first principles or formulate new first principles and reimagine education from the ground up In Turning Learning Right Side Up two of this generation s most provocative thinkers and practical doers have done just that They draw on the latest scientific research the most enduring human wisdom and their unique lifelong personal experiences transforming institutions that resist change And along the way they offer a powerful blueprint for a thriving society of passionate lifelong learners
