

# PROGRAMMING TUTORIALS — AND — PRACTICE PROBLEMS

# Tutorials In General Practice

**DJ Losen**

## **Tutorials In General Practice:**

**Tutorials in General Practice** Michael Mead, Henry Patterson, 1992 This book presents a series of tutorials that resulted from a debate between a trainer and a trainee in general practice to find what the trainee needed to learn what it was the trainer had to teach and how this might be achieved The aim is to give the reader a fundamental understanding of the conditions encountered in general practice and a summary of of the organization of health care in the UK Each chapter contains an introductory paragraph giving basic information about the problem or symptom which can be obtained from a review of the literature on the nature of the problem its incidence and prevalence and a comment on its significance This is followed by a brief outline of a case as it is presented The presentation is divided into steps and the tutorial discussion takes place as the problem unfolds The tutorial emphasizes the history and examination thought to be relevant and discusses issues which were raised Finally where possible the outcome of the case is recorded and a summary of the teaching points is given for any future revision The second edition of this textbook contains two new chapters on the nature of the tutorial and the GP s New Contract

A Textbook of General Practice Patrick White, Ann Wylie, 2004-04-30 Aimed at medical students and junior doctors A Textbook of General Practice 2e incorporates the essential information that a student needs to know and understand about general practice and being a general practitioner The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and prac

A Textbook of General Practice Second Edition Patrick White, Ann Wylie, 2004-04-30 Aimed at medical students and junior doctors A Textbook of General Practice 2e incorporates the essential information that a student needs to know and understand about general practice and being a general practitioner The learning style of the book is based on experiential and reflective principles in keeping with modern educative theory and practice It addresses changes in the curriculum and provides guidance on practical skills the theory of providing good medicine and the larger considerations of encouraging life long learning and professional development This is a relatively new approach in line with the GMCs recommendations and the MRCGP exams The new edition builds on the successful formula of the first by thoroughly reviewing and revising all content Self assessment sections have been added to all chapters and a glossary of terms is included at the end of the book Thinking discussion points have been extended and additional student quotes included

**Advances in Medical Education** A.J.J.A. Scherpbier, Cees P.M. van der Vleuten, J.J. Rethans, A.F.W. van der Steeg, 2012-12-06 About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht We received 525 abstracts for the conference divided in thematic poster sessions and platform presentations Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences During and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression Despite the large number of papers the editors have attempted to review and edit the papers as care

fully as possible Occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers Although we felt that our editorial task was not quite finished we nevertheless decided to include these papers We thank the many authors for their enthusiastic and prompt response to occasionally tedious editorial suggestions and requests We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education The editors want to thank Jocelyn Flippo Berger whose expertise with desk top publishing and perseverance was a great help

Professional Education for General Practice Peter Havelock,1995 Vocational training for general practice has been tremendously successful over the past two decades but the need became apparent at the beginning of the 1990s for revision of the education of GP trainers already experienced in setting up a training practice who were demanding a fresh more detailed consideration of the educational aspects of vocational training The authors of Professional Education for General Practice comprise general practitioners from training practices regional advisers in primary care and an expert in adult education They describe the history of vocational training and examine the educational requirements of adult learners then go on to discuss particular aspects of curriculum design assessment teaching methods trainer trainee relationships and evaluation followed by an appraisal of what changes are needed in training for general practice in the future Throughout the preparation of the book the authors worked closely with general practice trainers and trainees as well as their educators thus ensuring that the book is completely appropriate for these groups This book is essential for everyone involved in teaching GP trainers as well as for the trainers themselves and will be of interest to doctors training in primary care

Postgraduate Tutorials in General Practice W. Edward Warren,1995-01-01 So much information is currently available to the trainee GP that it is almost impossible to absorb it all especially within the allotted trainee year There is a need however for the trainee to have access to the most important material without having to wade through numerous publications and articles With this in mind the author an experienced General Practice Trainer has selected topics of relevance to most trainees and provided enough information in each chapter to form the basis of an hour s tutorial The aim of the book is to stimulate discussion between trainee and tutor and the topics chosen reflect those subject areas where junior doctors most commonly request tutorials
