Welfare Industry:

The Welfare Industry David Street, George T. Martin, Laura Kramer, 1979-08 Takes sociological stock of American poverty and the efforts at reform in the 1960s and early 70s focusing on urban public assistance and on efforts to improve the system particularly efforts that were pursued in the name of poor persons themselves A well organized but varied collection of research efforts to support the argument that two processes bureaucratization and professionalization alter poverty The authors eminently qualified in the sociological arena conclude that transformation rather than elimination of poverty is the net effect of such an analysis support for some intriguing notions with respect to professional behavior Choice Vol 17 No 2 April 1980

Minimum wage law 1913 1914 p 101 105 *Healthcare Privatization through Neoliberal Newspeak* John Lapidus, 2025-08-04 Using Sweden as its starting point this insightful book examines how universal health systems around the world are gradually being eroded by the privatization of provision and funding This book argues that the influence of commercial interests creates two parallel systems fatally undermining the principle that public healthcare should be equally available to all citizens Significantly it highlights how the language used to describe these neoliberal developments essentially disguises their broader impact a type of newspeak that frames privatization as a logical response to the pressures faced by welfare states Each chapter focuses on a different actor from private healthcare providers to insurance companies employers and unions illustrating the creeping commodification of healthcare not only in Sweden but also internationally Erudite and incisive this will be fascinating reading for scholars and students across public health political science and beyond
