Makua,Nomalungelo Ngubane,2024-06-03 This edited volume explores current practices in African higher education during
and post the global pandemic It fills a gap in the existing literature by focusing on student engagement and online learning in
South Africa and examines how pandemic restrictions amplified pre existing inequalities within the higher education sector
The book is divided into 3 sections The first section discusses various methods of instruction and the use of online tools for
facilitating learning succeeded by a section focusing on the resource implications of moving to online learning platforms from
a social justice perspective and finally the last section considers issues and concerns about online assessments and quality
assurance Drawing on lessons from the experiences of South African educators and students during the pandemic this book
provides a knowledge base essential for the effective management of online teaching and learning in Africa It is intended for
academic stakeholders to develop and engender an improved higher education climate **INFORMATION**

STUDIES IN DIGITAL COMMUNICATIONS. PART I. FEASIBILITY OF ASYNCHRONOUS MULTIPLEXING. PART II. PERFORMANCE OF HIGH-SPEED DIGITAL COMMUNICATIONS OVER TROPOSCATTER LINKS M P ISTENBATT,1963 Part I describes experiments and calculations aimed at demonstrating the feasibility of asyn chronous time multiplexing for multichannel speech The work here generally served to elaborate on the theoretical analysis and pre dictions made previously and demonstrated them in the laboratory The experiments tested vari ous aspects of the method and culminated in a realistic multichannel experiment with external coded speech signals The major feasibility demonstrations were done by using a digital com puter with A D equipment However an analog extremal coding system was built in order to demonstrate the

equipment simplicity The work here showed that asynchronous time multiplexing is feasible under the conditions treated for systems having as few as 24 sources It is concluded that the advantage of this method over synchronously multiplexed PCM is about 2.7 for 100 sources and 2.1 and 24 sources Increases in this advantage should be possible with system improvements The speech quality with this advantage is not distinguishable with casual listening from that of the usual PCM
