Martyn's Menu Dictionary (Classic Reprint) Charles Martyn,2015-09-27 Excerpt from Martyn s Menu Dictionary So great is the number of French words names and terms in use for dining and culinary purposes that it would require a large volume to list all of them and it has been difficult to decide just where to draw the line between those which do and those which do not need explanation or translation but I believe that the selection contained in this dictionary will be found of practical service when compiling or revising menus or bills of fare etc and on other similar occasions It should also be remarked that this book is not intended to take the place of works like Fellows Chef s Reminder and a Selection of Dishes or Senn s French Menus both of which excellent books are in purpose a dictionary of dishes instead of like this a dictionary of words and phrases The making of the book was suggested by the little volume entitled Latin de Cuisine published several years ago and in conception before this work commenced to grow to its present larger size I found many suggestions and a good deal of assistance in a study of its pages In conclusion I take pleasure in acknowledging that in the somewhat arduous task of compilation I received much valuable assistance from Mr Adolphe Meyer author of The Post Graduate Cookery Book and other equally well known works About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Foundations of Software Technology and*
