Department of the Treasury,1872 *Rural poverty in the Caribbean - Assets, social exclusion and agricultural livelihoods* Bailey, C.; Lashley, J.; Lazarus, L.; Marshall, D.; De la O Campos, A.P.,2024-12-03

Environmental shocks and stresses directly affect livelihoods in rural communities reliant on agriculture and fisheries making the income poor and those facing inequality especially vulnerable The complex relationships between the environment climate change and agriculture can lead to food insecurity poverty and inequality underscoring the need for better informed policies and effective programmes In the Caribbean poverty is often hidden particularly in middle to high income countries where inequalities and deprivations hinder efforts to tackle climate change resource degradation and access to sustainable food However there is insufficient data for poverty analysis in the agricultural and environmental sectors especially for marginalized populations This report examines the links between rural inequality food security agriculture and the environment in Barbados and Grenada It highlights the importance of physical financial human and social assets for sustainable livelihoods Conducted during the COVID 19 pandemic the study uses in depth interviews to offer policy recommendations aimed at improving access to assets and enhancing the resilience of farmers and fisherfolk supporting social mobility and protection against future crises
