Size Matters - Understanding Monumentality Across Ancient Civilizations Federico Buccellati, Sebastian Hageneuer, Sylva van der Heyden, Felix Levenson, 2019-07-30 When talking about monuments size undeniably matters or does it But how else can we measure monumentality Bringing together researchers from various fields such as archaeology museology history sociology Mesoamerican studies and art history this book discusses terminological and methodological approaches in both theoretical contributions and various case studies While focusing on architectural aspects this volume also discusses the social meaning of monuments the role of forced and free labour as well as textual monumentality The result is a modern interdisciplinary take on an important concept which is notoriously difficult to define

One Man's Planet Stephen M. Testa, 2009 One Man's Planet is a slightly off centered geologist's introduction to how politics pop culture and the earth sciences mix it up every day in all of our lives A humorous look at a myriad of issue that grace the news and drive political debates from local councils to international discourse One Man's Planet picks apart the rhetoric on all sides of these debates to look at how the science describes the issue often to the nakedness of the opposing

parties Tackling topics like climate energy water and hazards Stephen Testa channels Beanie Babies Mad Max and Shakespeare among others to examine the latest scientific understanding of these issues Author Stephen Testa weaves science personalities pop culture and politics into a very informative and entertaining tapestry on the planet today and the planet s tomorrow Come tour the Earth with Testa as your guide Minor Knowledge and Microhistory Sigurdur Gylfi Magnusson,David Olafsson,2016-10-04 This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries Using the abundance of handwritten material produced disseminated and consumed some centuries after the advent of print as its research material the book s focus is on its day to day usage and on minor knowledge i e text matter originating and rooted primarily in the everyday life of the peasantry The focus is on the history of education and communication in a global perspective Rather than engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men **Size Matters** Jayme A. Sokolow,2017 Size Matters A History of Height in America is the first history of height in America It begins with Native Americans in approximately 3300 BCE and continues to the present and tries to answer two important historical and biological questions why have the heights of Americans fluctuated over time and what do changing heights tell us about the American experience Size matters because height matters as a measure of health well being and economic inequality in American history Heights are sensitive barometers both to material and social circumstances and they are affected by subtle changes in families communities and society that have been very difficult to measure and understand until recently By bringing the body back into American history Size Matters helps us better understand important changes in the lives of Americans over time *Size Matters* Arts Council Collection,Natalie Rudd,2005 Comprising vivid reproductions of artworks from the Arts Council Collection this beautiful book considers the ways in which artists have experimented with scale It accompanies the Hayward Touring exhibition Size Matters which brings together recent sculptures and paintings of recognisable objects that have undergone a disorientating shift in size Featuring a postage stamp enlarged to the size of a billboard and chairs of doll house proportions the exhibition prompts the viewer to feel gigantic and tiny in turns Despite the playful quality of many of the works Size Matters poses serious questions as to why scale is so important to our culture and presents new writing on the subject *European Union Non-Discrimination Law and Intersectionality* Anna Lawson,2016-07-22 This book contributes to a critical reflection of

current legislative and jurisprudential developments in Non Discrimination Law focusing on the European Union The book is focused on intersectionality between gender race and disability and the question of whether and to what extent this intersection can be adequately addressed in EU law The discussion rests on two basic assumptions First the multiplication of discrimination grounds in EU law and other legal regimes should not result in a dilution of the demands of equality law Accordingly the book focuses on the three key grounds race gender and disability These constitute nodes around which other discrimination grounds can be grouped Second any multi ground non discrimination law framework needs to engage with the question of discrimination on several grounds This book provides a critical evaluation of some of the problems presented by such intersectionality and an opportunity to explore the issues in depth This collection offers some new proposals relating to the regrouping of identity categories and to the general approach to socio legal research in the field It also contains a comparative section which expands on practical experiences with intersectionality and law and a section dedicated to juridical responses to intersectionality The book will be a valuable resource for researchers academics and those working in the area of EU non discrimination law and policy
