Clemens Wendtner

The Survival Resource:

The Survival Resource Book Martha Allen Henderson, 1980-01-01 *Sensorimotor Psychotherapy* Pat Ogden, Janina Fisher, 2015-04-27 A book for clinicians and clients to use together that explains key concepts of body psychotherapy The body's intelligence is largely an untapped resource in psychotherapy yet the story told by the somatic narrative gesture posture prosody facial expressions eye gaze and movement is arguably more significant than the story told by the words The language of the body communicates implicit meanings and reveals the legacy of trauma and of early or forgotten dynamics with attachment figures To omit the body as a target of therapeutic action is an unfortunate oversight that deprives clients of a vital avenue of self knowledge and change Written for therapists and clients to explore together in therapy this book is a practical guide to the language of the body It begins with a section that orients therapists and clients to the volume and how to use it followed by an overview of the role of the brain and the use of mindfulness The last three sections are organized according to a phase approach to therapy focusing first on developing personal resources particularly somatic ones second on utilizing a bottom up somatic approach to memory and third on exploring the impact of attachment on procedural learning emotional biases and cognitive distortions Each chapter is accompanied by a guide to help therapists apply the chapter's teachings in clinical practice and by worksheets to help clients integrate the material on a personal level The concepts interventions and worksheets introduced in this book are designed as an adjunct to and in support of other methods of treatment rather than as a stand alone treatment or manualized approach By drawing on the therapeutic relationship and adjusting interventions to the particular needs of each client thoughtful attention to what is being spoken beneath the words through the body can heighten the intimacy of the therapist client journey and help change take place more easily in the hidden recesses of the self

Resource Competition and Community Structure David Tilman, 2020-03-31 One of the central questions of ecology is why there are so many different kinds of plants and animals Here David Tilman presents a theory of how organisms compete for resources and the way their competition promotes diversity Developing Hutchinson's suggestion that the main cause of diversity is the feeding relations of species this book builds a mechanistic resource based explanation of the structure and functioning of ecological communities In a detailed analysis of the Park Grass Experiments at the Rothamsted Experimental Station in England the author demonstrates that the dramatic results of these 120 years of experimentation are consistent with his theory as are observations in many other natural communities The consumer resource approach of this book is applicable to both animal and plant communities but the majority of Professor Tilman's discussion concentrates on the structure of plant communities All theoretical arguments are developed graphically and formal mathematics is kept to a minimum The final chapters of the book provide some testable speculations about resources and animal communities and explore such problems as the evolution of super species the differences between plant and animal community diversity patterns and the cause of plant succession

Two Michael J. Shea, Ph.D.,2008-08-19 The first volume of Biodynamic Craniosacral Therapy presented the basics of craniosacral therapy as a gentle compassionate healing art that can be used by psychologists midwives chiropractors and massage and physical therapists In this second volume author Michael Shea goes deeper into the entire biodynamic paradigm analyzing the relationship of trauma resolution psychodynamics and shamanism and providing practical meditations visualizations and clinical skills to restore physical spiritual and emotional health The book opens by exploring the meaning of biodynamic followed by a discussion of human embryology as a path to healing in any form of therapy This section offers a set of pioneering techniques based on perceiving stillness slow movement as a fundamental healing influence The next section describes the bridge between trauma resolution therapy and biodynamic work establishes a new containment model and offers skills for resolving shock and trauma A special section contains fresh strategies for anyone working with infants and children along with a provocative analysis linking the infant mother relationship to the patient therapist relationship Finally Shea provides a unique perspective on depth psychology mythology and healing This includes the defining difference between biodynamic craniosacral therapy and all other forms of craniosacral therapy the focus on the nature of spiritual disease and shamanism

The Resources of the Empire ,1924 Unfair Housing Mara S. Sidney,2003 It is difficult to ignore the fact that even as the United States becomes much more racially and ethnically diverse our neighborhoods remain largely segregated The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination yet for millions of Americans housing options remain far removed from the American Dream Why do most neighborhoods in American cities continue to be racially divided The problem suggests Mara Sidney lies with the policies themselves She contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them In *Unfair Housing* she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated As a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued A former undercover investigator for a fair housing advocacy group Sidney takes readers into the neighborhoods of Minneapolis and

Denver to show how federal housing policy actually works She examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy Sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national policies interact with local politics In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations Sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation As battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory
