Tobacco Control Legislation An Introductory Guide:

Tobacco Control Legislation D. Douglas Blanke, Vera da Costa e Silva, 2004 On title page Tools for advancing tobacco control in the 21st century

Tobacco Control Legislation D. Douglas Blanke, 2003 **Building Blocks for Tobacco Control** Vera da Costa e Silva, 2004-10-21 The idea for this handbook arose from an awareness that whilst various WHO documents called for developing national capacity for tobacco control there was not comprehensive guide to the development of such a capacity This book is thus essentially a pragmatic how to manual The Introduction presents the evolving definition of national capacity identifies the types of capacities needed for effective tobacco control and outlines the key features of building capacity Section 1 provides a descriptive overview of the tobacco epidemic It looks at tobacco as a risk factor presenting its health social and economic costs the global strategies of the tobacco industry to counteract public health measures the scientific evidence for effective tobacco control interventions and the WHO FCTC as a global solution to an epidemic with prominent politico legal and socio cultural attributes Section 2 focuses on the fundamental capacities necessary to empower countries to control the tobacco epidemic successfully These chapters apply the lessons learned from the experiences of different countries and offer advice and suggestions to enable countries to put the theories of tobacco control into practice

Tobacco and Public Health Peter Boyle, 2004 This book comprehensively covers the science and policy issues relevant to one of the major public health disasters of modern times It pulls together the aetiology and burden of the myriad of tobacco related diseases with the successes and failures of tobacco control policies The book looks at lessons learnt to help set health policy for reducing the burden of tobacco related diseases The book also deals with the international public health policy issues which bear on control of the problem of tobacco use and which vary between continents The editors are an international group distinguished in the field of tobacco related diseases epidemiology and tobacco control The contributors are world experts drawn from the various clinical fields This major reference text gives a unique overview of one of the major public health problems in both the developed and developing world The book is directed at an international public health and epidemiology audience including health economists and those interested in tobacco control

The Reality of Precaution Jonathan B. Wiener, Michael D. Rogers, James K. Hammitt, Peter H. Sand, 2013-05-13 The Precautionary Principle has sparked the central controversy over European and U S risk regulation The Reality of Precaution is the most comprehensive study to go beyond precaution as an abstract principle and test its reality in practice This groundbreaking resource combines detailed case studies of a wide array of risks to health safety environment and security a broad quantitative analysis and cross cutting chapters on politics law and perceptions The authors rebut the rhetoric of conflicting European and American approaches to risk and show that the reality has been the selective application of precaution to particular risks on both sides of the Atlantic as well as a constructive exchange of policy ideas toward better regulation The book offers a new view of precaution regulatory reform comparative analysis and transatlantic relations
