process from loose fibers through yarn and cloth to completed garments There are technologies that manufacture the pigments for plastics rubber and cosmetics Therefore dyes and pigments have a vast area of applications and have a huge demand in industry Contrary to popular opinion natural dyes are often neither safer nor more ecologically sound than synthetic dyes They are less permanent more difficult to apply wash out more easily and often involve the use of highly toxic mordant Of course the colour possibilities are far more limited the color of any natural dye may be easily copied by mixing synthetic dyes but many other colors are not easily obtained with natural dyes However some mordant are not very toxic and the idea of natural dyestuffs is aesthetically pleasing Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control There are various kind of natural dyes quinonoid dyes cyanine dyes azo dyes biflavyonyl dyes omochromes anthraquinone coprosma gesus etc The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool silk linen or cotton made to last more than one season Market value will benefit from consumer preferences for environmentally friendly products which will support consumption of high performance dyes and organic pigments This book basically deals with the use of carotenoids as food colours bianthraquinones and related compounds intermediate degradation products of biflavonyls dyestuffs containing nuclear sulphonic and carboxylic acid groups quinonoid dyes cyanine dyes optical whitening agents natural dyes for food stability of natural colourants in foods effect of additives pyrimidine pigments the total synthesis of the polyene pigments red pigment from geniposidic acid and amino compound effect of acid and amine on the formation of red pigment from geniposidic acid effect of the substituted position of amino group and chain length of amino compound etc Due to pollution problems in synthetic dyes and pigments industry the whole world is shifting towards the manufacturing of natural dyes and pigments The present book contains techniques of producing different natural dyes and pigments which has huge demand in domestic as well as in foreign market It is hoped that entrepreneurs technocrats existing units institutional libraries will find this book very useful TAGS Dyes Colors Pigments Dyes Dyeing and Pigments Natural dyes Natural Colorants for Dyeing and Pigments How to make ink from natural dyes Dyes and Pigments Natural dye yielding plants in India Natural Dyes from plants and insects Dyes and Dye Intermediates Pigments Making Natural Dyes from Plants natural dyeing techniques Natural pigment production All Natural Ways To Dye Fabric Technique of natural dyeing and traditional pattern Sustainable Technique on Natural Dye Best Plants For Dyeing Natural dye yielding plants in India Natural Vegetable Dyes How to Dye Fabric Clothes Natural Dyeing of Cotton Fabrics with Dyes Natural Dyes for clothes Making Natural Dyes from Plants ideas about Natural Dye Natural dyes from dye plants How to Make Natural Dyes to Dye Fabric Clothes How to dye clothes using natural methods Natural Dyes Producer India Natural Dyes Drying on clothes How to Make and Use Natural Dyes natural dyeing techniques Growing Color Natural Dyes from Plants How to Tie Dye With Natural Dye How to Make Natural Dyes to Dye
