A critical reflection Maria M., 2021-01-11 Essay from the year 2012 in the subject Communications Public Relations Advertising Marketing Social Media grade 1 7 Queen Margaret University language English abstract This paper aims to address the question whether an understanding of traditional communication theory can contribute to the effective use of social media or not The question will be addressed by utilising relevant theoretical frameworks as well as examining current developments and dominant debates within PR practice In order to discuss this topic it is first necessary to define what traditional communication theory is and what role it plays within PR practice Thus the assumption of PR to be an interdisciplinary study constituted of humanities sociology and communication appears important Whilst humanities studies focus on the viewpoint of rhetorical and discursive approaches and sociology studies understand communication in terms of systems process by adopting systems theory communication studies address PR from different mindsets Human communication is explained with psychological concepts persuasion is considered to be a goal of both mediated and direct communication and mass communication focuses on media relations theories and media effects Derived from this we can conclude that communication theory can be identified as an element of PR practice Correspondingly the use of social media is a technique of building media relations and therefore a subject of mass communication However these considerations do not explain which part of

communication theory can be identified as traditional Communication is inevitable in public relations PR practice because it contributes to the building of good relationships between an organisation and its stakeholders with the desired outcome of earning understanding and support and influencing opinion and behavior PR practitioners manage relations to community employees consumer and other stakeholders by understanding and using communication concepts and strategies Recently the communication practice of PR practitioners has been challenged by the heavy influence of the revolutionary character of the internet In other words they face the challenge of adapting their communication strategies at the same pace as the new technologies and tools are developing Especially the rise of social media provided a rich debate ground for PR practitioners PR theorists and academics of different disciplines **Teaching Mass Communication Theory** Kenneth D. Plowman,1996
