Uses Of Knowledge:

The Uses of Knowledge John Henry Newman,2011-07 **The Political Uses of Expert Knowledge** Christina Boswell,2009-05-28 This book examines the role of knowledge in policy showing how policymakers use research to establish authority in contentious areas of policy

Ecocentrism for Knowledge Management and Sustainability David Israel Contreras-Medina,Elia Socorro Díaz Nieto,Sergio Ernesto Medina-Cuéllar,Noé Aguilar-Rivera,2024-08-08 Through theoretical practical studies this book explains the foundational concepts of ecocentrism knowledge management and sustainability and advances the understanding of how ecocentric paradigms can be leveraged for the process of knowledge management and knowledge creation showcasing various applications of this practice and illustrating advantages and disadvantages of adopting an eco centric approach With a focus on the three themes of sustainability knowledge management and ecocentrism this edited volume presents practical case studies from various organizational contexts illustrating how sustainability related practices make use of knowledge management to meet their business objectives from an ecocentric perspective and highlighting the transversal application of this approach to various types of contexts The book also addresses cases of how post industrial organizations of the 21st century are using knowledge management in advancing the Sustainable Development Goals with reflections on ecocentrism There is practical theoretical and methodological content making this valuable to researchers academics and advanced students in the fields of knowledge management sustainability organizational studies and strategic management

The Uses of Knowledge John Henry Newman,1948 **Knowledge Management** Kai Mertins,Peter Heisig,Jens Vorbeck,2013-03-19 By Leif Edvinsson Professor of Intellectual Capital University of Lund Lund Sweden In a marketplace characterized by the growing importance of intangibles and knowledge as we have not only in Europe today it has become more and more evident how important knowledge management and Intellectual Capital management has become Some of us who started this knowledge exploration journeys some decades ago could perhaps realize how quickly this theme should become so important Today it is on almost every executive s agenda The timing the context and the comprehensive content of this second edition could not have been better In this second edition the authors have extended their overview with case studies and facts that confirm what we intuitively knew Knowledge and intangibles are a top strategic issue It is vital for an organization if it wants to be competitive sus tainable and profitable The solid overview and the holistic review and testing of the theories with real cases gives the reader a lot of facts and models of how man agement could invest in this area with very good return in one case with a return of investment of 200 % in one year It is a very extensive work on the growing field of knowledge management In its extension guidelines and emerging standards are already visible as e g the guide lines from the Danish government on IC reporting or of the Norwegian Association of Financial Analysts

Organizational Network Analysis Anna Ujwary-Gil,2019-12-11 The integrated meta model for organizational resource audit is a consistent and comprehensive instrument for auditing intangible resources and their

relations and associations from the network perspective This book undertakes a critically important problem of management sciences poorly recognized in literature although determining the current and future competitiveness of enterprises sectors and economies The author notes the need to introduce a theoretical input which is manifested by the meta model An expression of this treatment is the inclusion of the network as a structure of activities further knowledge as an activity and intangible assets as intellectual capital characterized by a structure of connections The case study presented is an illustration of the use of network analysis tools and other instruments to identify not only the most important resources tasks or actors as well as their effectiveness but also to connect the identified networks with each other The author opens the field for applying her methodology revealing the structural and dynamic features of the intangible resources of the organization The novelty of the proposed meta model shows the way to in depth applications of network analysis techniques in an intra organizational environment Organizational Network Analysis makes a significant contribution to the development of management sciences in terms of strategic management and more strictly resource approach to the company through structural definition of knowledge application of the concept of improvement oriented audit abandoning a narrow understanding of this technique in terms of compliance reliable presentation of audits available in the literature rigorous reasoning leading to the development of a meta model close linking of knowledge and resources with the strategy at the design stage of the developed audit model including the analysis of link dynamics and networks together with an extensive metrics proposal an interesting illustration of the application with the use of metrics tables and charts It will be of value to researchers academics managers and students in the fields of strategic management organizational studies social network analysis in management knowledge management and auditing knowledge resources in organizations

Database and Expert Systems Applications Dimitris Karagiannis,2013-11-11 The Database and Expert Systems Applications DEXA conferences are dedicated to providing an international forum for the presentation of applications in the database and expert systems field for the exchange of ideas and experiences and for defining requirements for the future systems in these fields After the very promising DEXA 90 in Vienna Austria we hope to have successfully established with this year's DEXA 91 a stage where scientists from diverse fields interested in application oriented research can present and discuss their work This year there was a total of more than 250 submitted papers from 28 different countries in all continents Only 98 of the papers could be accepted The collection of papers in these proceedings offers a cross section of the issues facing the area of databases and expert systems i.e. topics of basic research interest on one hand and questions occurring when developing applications on the other Major credit for the success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions Many persons contributed numerous hours to organize this conference The names of most of them will appear on the following pages In particular we wish to thank the Organization Committee Chairmen Johann Gordesch A Min Tjoa and Roland Wagner who also helped establishing the program Special thanks also go to
