

A brief summary of some of the most important maths concepts to be taught in Year 4

1. Choose appropriate methods

This section is concerned with getting children to make decisions about:

Which operation is involved in word problems

Whether calculations should be done mentally or with pen and paper.

How to explain and record the operations used in solving the problem.

Our worksheets focus on examples and draw children's attention to these issues, but it is important to realise that these decisions should be taken by children in most things they do in mathematics, so encourage them to discuss their work wherever possible.

They should be able to make up number stories about calculations; in other words, make up their own problems.

Here is an example of how **not** to do it!

Teacher: 'Paul, tell me a story about the sum $16 + 5 = 21$ '

Paul: 'Two rabbits were walking down the road. One said to the other "What's sixteen add five?". The other rabbit said "That's easy, twenty-one".'

The teacher was expecting something along the lines: 'Mary had sixteen stamps. She bought another five. Now she had **21** altogether'.

Another example of a number story: Sarah has **85p** pocket money each week. In four weeks she receives **340p** or **£3.40**.

Children should also be able to deduce an operation in a sum.

e.g. In the sum $24 * 5 = 120$, the $*$ stands for multiplication.

Lastly, they should be able to study the subtraction of different pairs of numbers and state and justify which is the easiest and which is the hardest to do. This really makes them think about the operation of subtraction.

Using And Applying Maths Year 5:

We Can Do It! Year 5 Using and Applying Maths Challenges Peter Clarke, Reader in Modern History and Fellow Peter Clarke, 2014-11 Learning how to use and apply maths to solve problems is a critical aspect of children's mathematical development during their time at primary school Our We Can Do It series offers stimulating problem solving challenges that inspire genuine mathematical thinking

Using and Applying Mathematics for 5 to 7 Year Olds Mike Askew, Sheila Ebbutt, Helen Williams, 1996 This resource is designed to help young children explain their mathematical thinking and apply mathematics in new situations A combination of teacher led discussion and supportive worksheets is used to develop and deepen children's understanding Teacher's notes provide support in developing the key problem solving skills of decision making communication and mathematical reasoning

Using and Applying Maths Hilary Koll, Steve Mills, 2005 Using and Applying Maths is a brand new strand of the best selling series Developing Numeracy There is one book of photocopiable maths activity sheets for each year of primary school These books make explicit the maths skills and processes that pupils need to develop and provide a wide range of enjoyable activities and investigations ideal for classroom use As the dust settles from the introduction of the National Numeracy Strategy teachers are becoming aware that maths lessons have recently become very contented They feel they must now focus more on the skills and processes that pupils need to solve problems and carry out mathematical investigations Also a change to the SATs last year saw an attempt to assess these skills through written tests creating even more demand for a series with this specific focus

New Heinemann Maths Year 5, Organising and Planning Guide Scottish Primary Mathematics Group, 2001 NHM Organising and Planning Guide is an excellent teacher resource It gives you all the support you need to implement the programme and plan your lessons

Mathematics Across the Curriculum Sue Fox, Liz Surtees, 2010-07-08 Looks at the theory and practice of providing inspiring challenging and engaging cross curricular mathematics lesson

Year 5 Maths Word Problems Peter Sumner, 2013-05
