Spectacles for Aphakia Curtis Dudley Benton, Robert C. Welsh, Robert Cooper Welsh, 1966      **Medcin** Peter S. Goltra, 2012-12-06 The practice of medicine has become an information intensive profession Pertinent and detailed information resources and references are proliferating rapidly while the quantity of patient data gathered during an episode of care can be daunting Identifying the best guideline and interventions which will lead to an optimal clinical outcome for an individual patient poses an increasingly difficult challenge Matching the detailed information about a particular patient with the parameters of a guideline may be tedious Attempting to identify or use a guideline with terms of definitions which differ from those found in a patient's record may well be impossible Here we confront the well known medical vocabulary problem which plagues nascent efforts to establish electronic medical records EMRs everywhere Efficient resource management and the adoption of cost effective strategies are of increasing importance in the new market realities of healthcare in the late 90's Whether providers seek to describe their practice implement continuous improvement engage in outcomes research or develop data driven guidelines a way to represent patient findings and events consistently is required The standard classifications for administrative data in healthcare such as ICD 9 CM have proven to be too coarse for a detailed examination of practice patterns and severity adjusted outcomes The use of free text to represent diagnoses and procedures is unwieldy unstructured free text cannot support information linkage and analyses without elaborate machine processing or hand abstraction and coding      **The Prescribing of Spectacles** Archibald Stanley Percival, 1910      The Massachusetts register , 1994-03-25      **The Refractionist** , 1926      *Pediatric Ophthalmology and Strabismus* Kenneth W.
