closer to God and one another We want all the whimsy and joy the holidays held when we were children before life crowded it out We want the holidays to reflect our love for Jesus and reveal the grace that has been lavished on us but life is so busy that setting a game plan just doesn't happen No more It's time to stop trying to survive the holidays or over indulge the whimsy and instead live in the abundant life God called us to live Sacred Holidays is part book and part resource meant to help you avoid what has tripped you up in the past and give you insights tips and tools to make your holidays less chaotic and more about loving Jesus and others Don't let your holidays be marked by regret whirlwinds or survival mindset Let's celebrate every holiday together purposefully and worshipfully loving Jesus and others well in every moment

Artificial Intelligence Through Search Chris Thornton, Benedict Du Boulay, 2012-12-06 This is an important textbook on artificial intelligence that uses the unifying thread of search to bring together most of the major techniques used in symbolic artificial intelligence The authors aware of the pitfalls of being too general or too academic have taken a practical approach in that they include program code to illustrate their ideas Furthermore code is offered in both POP 11 and Prolog thereby giving a dual perspective highlighting the merits of these languages Each chapter covers one technique and divides up into three sections a section which introduces the technique and its usual applications and suggests how it can be understood as a variant generalisation of search a section which developed a low level POP 11 implementation a section which develops a high level Prolog implementation of the technique The authors also include useful notes on alternative treatments to the material further reading and exercises As a practical book it will be welcomed by a wide audience including those already experienced in AI students with some background in programming who are taking an introductory course in AI and lecturers looking for a precise professional and practical text book to use in their AI courses About the authors Dr Christopher Thornton has a BA in Economics an Sc in Computer Science and a DPhil in Artificial Intelligence Formerly a lecturer in the Department of AI at the University of Edinburgh he is now a lecturer in AI in the School of Cognitive and Computing Sciences at the University of Sussex Professor Benedict du Boulay has a BSc in Physics and a PhD in Artificial Intelligence Previously a lecturer in the Department of Computing Science at the University of Aberdeen he is currently Professor of Artificial Intelligence also in the School of Cognitive and Computing Sciences University of Sussex
