Biddle, 1992-10-23 Comprehensive planning has become an essential element in the management of the modern university library The purpose of this book is to help those now engaged in this important management function by summarizing the history of academic library planning and analyzing its practice in a group of major libraries over the past several decades The most significant changes confronting academic libraries for the past several decades have been technological social and economic Strategic planning is used as the tool for making these libraries more responsive to their environments and for helping them anticipate and prepare for change Stanton F Biddle examines the extent to which strategic planning is being employed analyzes the planning documents and develops guidelines for improving the quality of future planning efforts The volume begins with a discussion of strategic or long range planning taken from the literature of management and organizational theory The next chapter reviews the historical development of large academic libraries and the history of the application of contemporary management theories and practices to their administrations through the 1970s The following chapter focuses on the widespread dissatisfaction with traditional approaches to library management in the 1960s and 1970s The next two chapters compare library planning source documents and the final chapter concludes with recommendations *Library Management* Bridgit McCafferty, 2021-05-26 Most professional librarians even recent graduates manage something whether it be a project service department or a whole library This book explains the different managerial roles at libraries looking at the levels of managers what they do and how they do it The goal is to explore the unique challenges faced by different types of library managers in order to prepare early and mid career librarians to step into new roles and to think about how they might progress toward upper management in a library The approach is practice driven with a particular focus on the soft skills that are needed to be successful as a manager *Library Management A Practical Guide for Librarians* features three parts project management middle management and upper management These sections cover the different kinds of challenges that face people at each level of their career exploring how these challenges can help prepare librarians for promotion to the next level The purpose of these sections is to show how management skills develop over the course of one s career and to explore how leaders

changes from context to context Though each section focuses on a particular level of authority the lessons can be useful for and applied to all of the levels discussed For example the same librarian might fill different roles in different contexts A dean might serve as a library s executive but also manage a university wide project or a middle manager might step into the role of dean temporarily or might wonder what the next level of management would require *Course [outline] ...
