Until Volume One:

Phenomenology and Deconstruction, Volume One Robert Denoon Cumming, 1991 Cumming also shows that conversion is not merely a personal predisposition of Sartre's further manifest in his later conversions to Heidegger and to a version of Marxism Conversion is also philosophical preoccupation illustrated by the conversion to the imaginary whereby Sartre explains how he himself as well as Genet and Flaubert became writers Finally Cumming details how Husserl's phenomenological method contributed both to the shaping of Sartre's style as a literary writer and to his theory of style

Cry for Health, Volume 1, Health Jesse Sleeman, 2011 Since the 1950s the prevalence of the so called diseases of civilisation has continued to skyrocket in Western countries Today as the same story is beginning to be repeated in newly industrialised nations modern diseases are reaching pandemic proportions Why has this happened The medical profession's spin is that the culprit is the aging of the population But as Cry for Health Vol 1 reveals there is overwhelming evidence for why our populations are ailing evidence health authorities and governments have chosen to ignore or have refused to acknowledge or have kept hidden from the public to keep them clueless to the real culprits many modern technologies and our modern lifestyles

The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united
