## Wild Dogs:

**The African Wild Dog** Scott Creel, Nancy Marusha Creel, 2019-12-31 With only 5 000 surviving the African wild dog *Lycaon pictus* is one of the world's most endangered large carnivores and one of the most remarkable. This comprehensive portrait of wild dogs incorporates previously scattered information with important new findings from a six year study in Tanzania's Selous Game Reserve Africa's largest protected area. The book emphasizes ecology concentrating on why wild dogs fare poorly in protected areas that maintain healthy populations of lions hyenas or other top carnivores. In addition to conservation issues it covers fascinating aspects of wild dog behavior and social evolution. The Creels use demographic behavioral endocrine and genetic approaches to examine how and why nonbreeding pack mates help breeding pairs raise their litters. They also present the largest data set ever collected on mammalian predator-prey interactions and the evolution of cooperative hunting allowing them to account for wild dogs' prowess as hunters. By using a large sample size and sophisticated analytical tools the authors step well beyond previous research. Their results include some surprises that will cause even specialists to rethink certain propositions such as the idea that wild dogs are unusually vulnerable to infectious disease. Several findings apply broadly to the management of other protected areas. Of clear appeal to ecologists studying predation and cooperation in any population this book collects and expands a cache of information useful to anyone studying conservation as well as to amateurs intrigued by the once maligned but extraordinary wild dog.

**Wild Dogs** Timothy L. Biel, 2000 Discusses the habits and behavior of wild dogs including the gray wolf jackal dingo fennec bat eared fox and coyote.

**The African Wild Dog** Scott Creel, Nancy Marusha Creel, 2002-06-09 This book is based on a six year study of African wild dogs *lycaon pictus* in Tanzania's Selous Game Reserve the largest protected area in Africa and one of the least studied.

**The Wild Dogs in Life and Legend** Maxwell Riddle, 1979 *The African Wild Dog* Joshua Ross Ginsberg, David Whyte Macdonald, IUCN/SSC Candid Specialist Group, 1997 Over the last 30 years the African wild dog population has declined dramatically. Dogs have disappeared from 25 of the 39 countries where they were previously found and only 6 populations are believed to number more than 100. Today it is believed that only between 3 000 5 500 dogs remain in 600 1 000 packs with most to be found in eastern and southern Africa. The dramatic reduction in their population is attributed to a number of factors including human population growth and activities deterioration of habitat and contact with domestic dogs and their diseases. This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas ranging from habitat management and conservation to monitoring domestic dogs.

Spirit of the Wild Dog Lesley J. Rogers, Gisela Kaplan, Gisela T. Kaplan, 2003 Covers all aspects of wild dogs their variety of species and where and how they live in the wild.

Running Wild John McNutt, Lesley Boggs, Hélène Heldring, Dave Hamman, 1996 Looks at wild dogs that roam the African savanna and their social behavior hunting techniques and how they raise their young.

Table of Contents Introduction What is an African wild dog How do African wild dogs act Where did African wild dogs come from Conclusion Author Bio Publisher Introduction African wild dogs probably have the most obvious name among animals For one they are from Africa they are wild and they are definitely dogs However just because their name is obvious doesn't mean everything about them is The African wild dog often neglected when it comes to talking about canids such as wolves coyotes and other dogs is actually a very interesting animal different from other dogs in some ways and very much like them in others      In Search of the African Wild Dog Roger De la Harpe,Pat De la Harpe,2009 Arguable the most successful hunter in Africa the African wild dog ironically finds itself on the brink of extinction Part of the Canidae family and sharing a general similarity with the various canids worldwide the African wild dog differs fundamentally from other canids it belongs to the genus *Lycaon* which formed a new branch on the family tree some 3 million years back and subsequently evolved independently Today it is the only survivor of this unique line and because of its genetic difference is unable to interbreed with any of its canid relatives or even with the domestic dog Previously found in diverse habitats across the continent it has tragically disappeared from much of its former range Today there are only an estimated 3 000 to 5 500 wild dogs left in the whole of Africa a mere 500 of which occur in South Africa In spite of or perhaps because of the elusive nature of the wild dogs and their limited population numbers Roger and Pat have produced their best book yet      *Wild Dogs* Jennifer W. Sheldon,2013-09-17 *Wild Dogs The Natural History of the Nondomestic Canidae* presents a comprehensive current natural history of the nondomestic dog species In this book a prodigious amount of previously uncollected information is presented in a straightforward form The organization of the book is alphabetical by genus and within each genus alphabetically by Linnean species name In some cases very little is known about a species In other cases the amount of available information is enormous and has been distilled to summary form The volume is intended as a straightforward assemblage of material It points the way toward but is not intended to provide a synthetic or theoretical big picture The book is intended as a general reference work Biologists wildlife managers mammalogists conservationists students and carnivore specialists will find here information assembled nowhere else Over 600 sources are included in the bibliography so the book also serves as an entry to the literature for those seeking more technical or specialized knowledge Naturalists and outdoorsmen will also enjoy discovering the particulars of familiar and unfamiliar canid species      *Africa's Wild Dogs* Jocelin Kagan,2020 There are roughly 6 600 wild dogs left in Africa yet they have cast such a spell on top wildlife photographer and naturalist Jocelin Kagan that she is determined to help save them If left to their own devices they are more than capable of thriving as this sumptuous photographic natural history shows Jocelin has called in world experts to add their latest findings about these resourceful graceful and highly skilled family groups Nomadic predators whose territories range thousands of kilometres they hunt co operatively preying on small herbivores Non confrontational they form complex bonds as this book reveals Now

restricted to small populations and threatened by some shoot to kill policies habitat fragmentation diseases from domestic dogs climate change and snares as well as natural predation from hyenas and lions Africa s wild dogs will be supported by all the royalties from this book
