Frederick Harold Swanson, 2015 Areas of the Rocky Mountains of Idaho and Montana are some of the most important remaining examples of American wilderness These areas have been preserved because of citizens who stood against private and government plans to build roads and dams for timber and hydropower projects and to diminish wildlife habitat Where Roads Will Never Reach tells the stories of hunters anglers outfitters scientists and other concerned citizens who devoted themselves to protecting remnant wild lands and ecosystems in the northern Rockies Beginning in the 1940s and 1950s as encroaching roads dams and clearcuts degraded habitat for native trout salmon grizzly bears and other mammals large and small these alarmed men and women took action Environmental historian Frederick Swanson argues that their heartfelt eloquent message on behalf of wild creatures and the places they live helped boost the American wilderness movement to its current prominence *General Technical Report NE* ,1980 **Park Science** ,2009 **Pioneering Conservation in Alaska** Ken Ross, 2017-10-01 A companion volume to Environmental Conflict in Alaska Pioneering Conservation in Alaska chronicles the central land and wildlife issues and the growth of environmental conservation in Alaska during its Russian and territorial eras The Alaskan frontier tempted fur traders whalers salmon fishers gold miners hunters and oilmen to take what they could without regard for long term consequences Wildlife species ecosystems and Native cultures suffered sometimes irreparably Damage to wildlife and lands drew the attention of environmentalists including John Muir who applied their influence to enact wildlife protection laws and set aside lands for conservation Alaska served as a testing ground for emergent national resource policy in the United States as environmental values of species and ecosystem sustainability replaced the unrestrained exploitation of Alaska s early frontier days Efforts of conservation leaders and the territory s isolation small human population and late development prevented widespread destruction and gave Americans a unique opportunity to protect some of the world s most pristine wilderness Enhanced by more than 100 photographs Pioneering Conservation in Alaska illustrates the historical precedents for current natural resource disputes in Alaska and will fascinate readers interested in wildlife and conservation Proceedings of the 1998 Northeastern Recreation Research Symposium, April 5-7, 1998, the Sagamore on Lake George in Bolton Landing, New York Hans G. Gifford Pinchot and the Making of Modern Environmentalism Char Miller, 2001-10. In *Mountains of Memory*, seasoned wilderness dweller Don Scheese charts a long season of watching for and fighting fires in Idaho's River of No Return Wilderness, 151,000 acres, the largest federal wilderness area in the mainland United States. An inspiring tale of self-discovery, *Mountains of Memory* paints a complex portrait of the natural, institutional, and historical forces that have shaped the great forested landscapes of the American West. A student of nature writing as well as a fire lookout with over a decade of experience, Scheese recounts his life at the top of the world along with daring adventures such as backpacking and mountaineering in the Bighorn Crags and kayaking down the Middle Fork of the Salmon River. All the while, he touches upon the mysterious and powerful realities of the wilderness around him and stunning, dawn-visible lightning within the glass cage perched on a 9,000-foot mountain, stirring flashes of lightning visible all around the dark landscape as the radio crackles with reports of strikes observed and fires spotted. Long-awaited trips down the mountain to civilization for cold beer and hot pizza. In the tradition of Edward Abbey and Gary Snyder, Don Scheese offers readers a meditation on the
