

What the reviewers say . . .

"A concise, very readable, and soundly researched book. It provides a challenge to traditional androcentric thinking in educational administration and deserves to be widely read for that reason alone. Its excellent summary of unpublished research in this field and its readability also make it worthwhile and enjoyable reading."

—Journal of Educational Administration

"This is a thoughtful, well-researched volume, reflective of the author's years directing a doctoral program in educational administration and working with women who came or wanted to be administrators. If carried out, Shakeshaft's suggestions for curricular reform would revolutionize the field."

—Sue Foley

"Fresh material on a topic that will engage almost any educator. . . Will be of interest to females who hold or hope to hold administrative positions, as well as males who work with female leaders in education. It's likely to produce a healthy re-evaluation of former, current, and future roles of women in administration."

—Journal of Texas Elementary Principals and Supervisors Association

"Research and writing on educational management has consistently ignored the central issue of gender in education. A warm welcome should be extended to this book which provides an excellent historical analysis, a convincing critique of the conventional literature, and a significant foundation for women in educational management to build on."

Women In Educational Administration:

Women in Educational Administration Charol Shakeshaft, 1989-05 This book was written as a response to that vast quantity of literature published on administration and administrators which purports to be comprehensive A more honest description of this work might describe it as research and writing on the behavior and characteristics of male administrators This book seeks to reconsider what we know about organizational behavior It asks us to first lean of the world of women in schools and then to speculate upon what what would happen if took that world into account when we developed theory and practice in school administration Women and Educational Leadership Margaret Grogan, Charol Shakeshaft, 2010-11-11 This groundbreaking book presents a new way of looking at leadership that is anchored in research on women leaders in education The authors examine how successful women in education lead and offer suggestions and ideas for developing and honing these exemplary leadership practices Women and Educational Leadership shows how the qualities that characterize women s approaches to leadership differ from traditional approaches whether the traditional leader is a woman or a man The authors reveal that women leaders are more collaborative by nature and demonstrate a commitment to social justice They tend to bring an instructional focus to leadership include spiritual dimensions in their work and strive for balance between the personal and professional This important book offers a new model of leadership that shifts away from the traditional heroic notion of leadership to the collective account of leadership that focuses on leadership for a specific purpose like social justice The authors include illustrative examples of leaders who have brought diverse groups to work toward common ground They also show how leadership is a way to facilitate and support the work of organizational members The ideas and suggestions presented throughout the book can help the next generation fulfill the promise of a new tradition of leadership Women and Educational Leadership is part of the Jossey Bass Leadership Library in Education series *Women in Educational Administration* Rita M. Costick, 1978 **Highly Successful Women Administrators** Sandra Lee Gupton, Gloria Appelt Slick, 1996-09-25 The under representation of women in educational administration is addressed in this book The experiences of 15 female educational leaders in their quest for ascent to and acquisition of leadership positions are described Through their experiences the administrators also offer advice to other women and men in the profession Important themes emerging from the book include women s lack of aspiration to administrative positions cultural stereotypes regarding gender roles and leadership and insufficient support systems for and among women in educational leadership **Women Leading In Education** Diane M. Dunlap, Patricia A. Schmuck, 1994-11-04 An eclectic volume that documents how women lead in education and points toward a feminist agenda of women in education in the next decade The chapters are written by academics who are often educational leaders and by practitioners from their own experiences or through a study of women leaders The chapters reflect various methods of study incl *Cracking the Wall* Patricia Turner Mitchell, 1993 Women in Educational Administration Dorothy M. Miriam Hirsch, 2009 Women in educational leadership embody a paradoxical reality they must balance the formal power of school administration with the inclusivity responsiveness and compassion necessary to nurture a community of care This negotiation between agency and communion first articulated by Bakan 1966 contains many challenges for women in positions of educational leadership How do women in educational administration retain the mantle of leadership and legitimacy without compromising their commitment to care and community This research examines how four women in positions of educational leadership navigate the terrain of agency and communion Description analysis and interpretation of the lived experience of these educational leaders provide a window into their lives as educational administrators This analysis lends shape and texture to the realities of female educational leadership and offers a new lens for understanding the relational practices of school leaders School administrators teachers researchers and others who care deeply about schools may find this book valuable in refining their thinking about educational leadership

Ragland, 1995-03-15 It isn't easy to find published research on the progress of women as educational leaders Historically classroom teaching positions have been overwhelmingly populated by women and minorities while the top administrative positions were held by white males Consequently most of the research has focused on male leaders Now however more and more women are reaching the top in educational administration Women as Educational Leaders focuses on this important trend Authors Hill and Ragland use candid interviews with outstanding and successful female educational leaders to create this timely guide for practitioners They spotlight the personal and professional lives of 35 women who share stories of their journeys to the top of the ranks The book pinpoints six common barriers most women encounter including lack of political savvy unfocused career positioning and the long standing male dominance of key leadership roles The authors encourage readers to dump old myths stereotypes and baggage from the past to make way for a more open and positive mindset Gleaning information from the interviews Hill and Ragland offer a series of strategies for professional growth and self development including goal setting creating productive mentoring relationships and using formal and informal structures for career advancement They include a self assessment instrument to help you determine your personal leadership competencies and create a more focused plan for your career as an administrative leader Women As Educational Leaders is an in depth look at what it takes to become successful as an educational leader It gives you guidelines strategies techniques and commonsense advice you can use immediately no matter where you re at in your rise to the top
