

# Women In Space

**Carole S. Briggs**

## **Women In Space:**

*Women in Space* Karen Gibson,2014-02-01 When Valentina Tereshkova blasted off aboard Vostok 6 on June 16 1963 she became the first woman to rocket into space It would be 19 years before another woman got a chance cosmonaut Svetlana Savitskaya in 1982 followed by American astronaut Sally Ride a year later And by breaking the stratospheric ceiling these women forged a path for many female astronauts cosmonauts and mission specialists to follow In *Women in Space* author Karen Bush Gibson profiles 23 pioneers all of whom achieved greatness in orbit Read about Eileen Collins the first woman to command the Space Shuttle Peggy Whitson who has logged more than a year in orbit aboard the International Space Station Mae Jemison the first African American woman in space as well as astronauts from Japan Canada Italy South Korea France and more Learn too about the Mercury 13 American women selected by NASA in the late 1950s to train for spaceflight Though they matched and sometimes surpassed their male counterparts in performance they were ultimately denied the opportunity to head out to the launching pad Their story and the stories of pilots physicists and doctors who followed them demonstrate the vital role women have played in the quest for scientific understanding Karen Bush Gibson is the author of *Women Aviators Native American History for Kids* and three dozen other books for young readers She lives in Norman Oklahoma

*Women in Space* Caitie McAneney,2015-07-15 From earthly training to out of this world space exploration astronauts have worked to uncover the secrets of our universe Some of the most fascinating stories come from the women who ve entered this male dominated industry and changed it forever This biographical text looks at the lives of some of the most interesting women who ve been to space including big names such as Sally Ride Mae Jemison and Valentina Tereshkova as well as lesser known figures such as Eileen Collins and Peggy Whitson Readers will learn about these women s passionate spirit and their drive break down the social barriers holding them back and may be inspired to one day seek a career in space The text is supported by fact boxes and a comprehensive timeline [Women in Space Who Changed the World](#) Sonia Gueldenpfennig,2011-12-15 Profiles eleven women who have contributed significantly to the field of astronautics from Sally Ride the first female astronaut to Julie Payette the Chief Astronaut for the Canadian Space Agency **Women in Space**

Shaina Indovino,2014-09-02 Women have made major contributions to science throughout history including in the field of space exploration Learn about the lives of some of the most amazing women in space exploration from Sally Ride to Mae Jemison as well as their exciting and important work Discover what it takes to work in space exploration Find out about the opportunities for women in the field Read *Women in Space* to see if following in the footsteps of the many brilliant women who have made their mark in space exploration is something you want to do **Women in Space** N. B. Grace,2006-08 A brief collective biography of women who have taken part in space missions [Women in Space - Following Valentina](#) David J. Shayler,Shayler David,Ian A. Moule,2005-04-06 This is the only book that provides the full story of the role of women in space exploration Previously unpublished photographs of various aspects of training and participation in spaceflights are

included Personal interviews with female cosmonauts and astronauts Traces the history of female aviation milestones from the early part of the 20th Century to the current space programme **Women in Space** Carole S. Briggs,1998-01-01 Profiles some of the women including two Russians who have had important roles in space exploration and provides a brief history of the U S space program **Women Spacefarers** Umberto Cavallaro,2017-03-02 This book tells the fascinating stories of the valiant women who broke down barriers to join the space program Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963 they became players in the greatest adventure of our time The author contextualizes their accomplishments in light of the political and cultural climate from the Cold War in the background to the changing status of women in society at large during the Seventies The book includes the biographies of and in some cases interviews with the sixty women who flew in space in the first half century of space history It reports their achievements and some little known details The result is a gallery of pioneering women who reached for the stars women who with exceptional skill hard work and dedication reached impressive careers as accomplished pilots researchers and engineers many are now in high level managerial positions both at NASA or in public and private organizations and all left a legacy of strength

Women Astronauts Laura S. Woodmansee,2002 Few books are relating the story of women in astronautics that one concerns all women and the special place they had in the history of space exploration **Space for Women** Pamela Freni,2002 A history of women who were recruited as potential astronauts early in the space race and their attempt to be the first females in space It tells of their success in the rigorous testing and training and then the ensuing resistance by the male dominated space program The book offers information on ensuing NASA programs culminating with the successful integration of women in today s space program **Women's Space** Virginia Chieffo Raguin,Sarah Stanbury,2006-01-01 This interdisciplinary collection addresses the location of women and their bequests within the single most important public and social space in pre Reformation Europe the Roman Catholic Church This innovative focus brings attention to gender and space as experienced in the medieval parish as well as in monastic and cathedral space Through provocative handling of historical content and theory the contributors explore strategies of exclusion and of inclusion and note patterns of later writers who neglect or rewrite records of female presence Essays on the York religious cycle the chronicle of the monastery at Ely and The Book of Margery Kempe explore how medieval writers used texts as fictive spaces on which to graft responses to the gendered uses of real church buildings These text based essays are juxtaposed with tightly focused archival research in art history and history on Florentine patronage and English parish seating as well as with more broadly synthetic studies on access of women to shrines and on gendered left right placement in ritual art *Right Stuff, Wrong Sex* Margaret A. Weitekamp,2004-10-18 Book Review Sally Ride Lynn Sherr,2014-06-03 The definitive biography of Sally Ride America s first woman in space with exclusive insights from Ride s family and partner by the ABC reporter who covered NASA during its transformation from a test pilot boys club to a more inclusive elite Sally Ride made history as the first American woman in

space. A member of the first astronaut class to include women, she broke through a quarter century of white male fighter jocks when NASA chose her for the seventh shuttle mission, cracking the celestial ceiling and inspiring several generations of women. After a second flight, Ride served on the panels investigating the Challenger explosion and the Columbia disintegration that killed all aboard. In both instances, she faulted NASA's rush to meet mission deadlines and its organizational failures. She cofounded a company promoting science and education for children, especially girls. Sherr also writes about Ride's scrupulously guarded personal life; she kept her sexual orientation private, with exclusive access to Ride's partner, her former husband, her family, and countless friends and colleagues. Sherr draws from Ride's diaries, files, and letters. This is a rich biography of a fascinating woman whose life intersected with revolutionary social and scientific changes in America. Sherr's revealing portrait is warm and admiring but unsparing. It makes this extraordinarily talented and bold woman an inspiration to millions come alive.

**Women Space Pioneers** Carole S. Briggs, 2005-01-01. Looks at the efforts and accomplishments of some of the first women in space, including Jerrie Cobb, Mae Jemison, Sally K. Ride, Valentina Tereshkova, and Eileen Collins.

*Galaxy Girls* Libby Jackson, 2018-06-05. Filled with beautiful full-color illustrations, a groundbreaking compendium honoring the amazing true stories of fifty inspirational women who helped fuel some of the greatest achievements in space exploration from the nineteenth century to today, including Hidden Figures' Mary Jackson and Katherine Johnson, as well as former NASA Chief Astronaut Peggy Whitson, the record-holding American biochemistry researcher who has spent the most cumulative time in space. When Neil Armstrong stepped off the ladder of the lunar module Eagle, he famously spoke of one small step for man. But Armstrong would not have reached the moon without the help of women. Today, females across the earth and above it—astronauts and mathematicians, engineers and physicists, test pilots and aerospace psychophysicists—are pushing the boundaries of human knowledge, helping us to understand the universe and our place in it. *Galaxy Girls* celebrates more than four dozen extraordinary women from around the globe whose contributions have been fundamental to the story of humankind's quest to reach the stars. From Ada Lovelace in the nineteenth century to the colored computers behind the Apollo missions, from the astronauts breaking records on the International Space Station to the scientific pioneers blazing the way to Mars, *Galaxy Girls* goes boldly where few books have gone before, celebrating this band of heroic sisters and their remarkable and often little-known scientific achievements. Written by Libby Jackson, a leading British expert in human space flight, and illustrated with striking artwork from the students of London College of Communication, *Galaxy Girls* will fire the imaginations of trailblazers of all ages.

*Women, Space and Utopia 1600-1800* Nicole Pohl, 2017-05-15. The first full-length study of women's utopian spatial imagination in the seventeenth and eighteenth centuries, this book explores the sophisticated correlation between identity and social space. The investigation is mainly driven by conceptual questions and thus seeks to link theoretical debates about space, gender, and utopianism to historiographic debates about the gendered social production of space. As Pohl's primary aim is to demonstrate how women

writers explore the complex gender politics of space specific attention is given to spaces that feature widely in contemporary utopian imagination Arcadia the palace the convent the harem and the country house The early modern writers Lady Mary Wroth and Margaret Cavendish seek to recreate Paradise in their versions of Eden and Jerusalem the one yearns for Arcadia the other for Solomon s Temple Margaret Cavendish and Mary Astell redefine the convent as an emancipatory space dismissing its symbolic meaning as a confining and surveilled architecture The utopia of the country house in the work of Delarivier Manley Sarah Scott and Mary Hamilton will reveal how women writers resignify the traditional metonym of the country estate The study will finish with an investigation of Oriental tales and travel writing by Ellis Cornelia Knight Lady Mary Montagu Elizabeth Craven and Lady Hester Stanhope who unveil the seraglio as a location for a Western specifically masculine discourse on Orientalism despotism and female sexuality and offers their own utopian judgment *Integrating Women Into the Astronaut Corps* Amy E. Foster, 2011-12 Why Amy E Foster asks did it take two decades after the Soviet Union launched its first female cosmonaut for the United States to send its first female astronaut into space In answering this question Foster recounts the complicated history of integrating women into NASA s astronaut corps NASA selected its first six female astronauts in 1978 Foster examines the political technological and cultural challenges that the agency had to overcome to usher in this new era in spaceflight She shows how NASA had long developed progressive hiring policies but was limited in executing them by a national agenda to beat the Soviets to the moon budget constraints and cultural ideas about women s roles in America Lively writing and compelling stories including personal interviews with America s first women astronauts propel Foster s account Through extensive archival research Foster also examines NASA s directives about sexual discrimination the technological issues in integrating women into the corps and the popular media s discussion of women in space Foster puts together a truly original study of the experiences not only of early women astronauts but also of the managers and engineers who helped launch them into space In documenting these events Foster offers a broader understanding of the difficulties in sexually integrating any workplace even when the organization approaches the situation with as positive an outlook and as strong a motivation as did NASA **Wally Funk's Race for Space** Sue Nelson, 2018-10-04

As seen in the major Netflix documentary *Mercury 13* A Daily Mail Book of the Week In 1961 Wally Funk was the youngest of thirteen American female pilots in the Woman in Space programme Her mission was to become one of the first women astronauts But a combination of politics and prejudice meant the programme was abruptly cancelled Neither Wally nor the other pilots ever made it into space Now approaching eighty Wally is joined by fellow space enthusiast Sue Nelson as she races to make her giant leap before it s too late They travel across the United States and Europe taking in NASA s mission control in Houston and Spaceport America in New Mexico where Wally s ride into space awaits meeting with female astronauts and trailblazers along the way Touching on the Space Race and women s achievements in aviation this is the remarkable story of a courageous pioneer who could have been the first woman in space *The Mercury 13* Martha

Ackmann,2003-06-03 For readers of The Astronaut Wives Club The Mercury 13 reveals the little known true story of the remarkable women who trained for NASA space flight In 1961 just as NASA launched its first man into space a group of women underwent secret testing in the hopes of becoming America s first female astronauts They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts but they were summarily dismissed by the boys club at NASA and on Capitol Hill The USSR sent its first woman into space in 1963 the United States did not follow suit for another twenty years For the first time Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America s space race against the Soviet Union In addition to talking extensively to these women Ackmann interviewed Chuck Yeager John Glenn Scott Carpenter and others at NASA and in the White House with firsthand knowledge of the program and includes here never before seen photographs of the Mercury 13 passing their Lovelace tests Despite the crushing disappointment of watching their dreams being derailed the Mercury 13 went on to extraordinary achievement in their lives Jerrie Cobb who began flying when she was so small she had to sit on pillows to see out of the cockpit dedicated her life to flying solo missions to the Amazon rain forest Wally Funk who talked her way into the Lovelace trials went on to become one of the first female FAA investigators Janey Hart mother of eight and at age forty the oldest astronaut candidate had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women A provocative tribute to these extraordinary women The Mercury 13 is an unforgettable story of determination resilience and inextinguishable hope

**Women in Space Exploration** Andrew Morke, Women have been traditionally underrepresented in space exploration but that has changed in recent years A career in space exploration is the perfect choice for a variety of people from those who like conducting research about the universe while on Earth to adventurous souls who want to travel to and live in space In this book you ll learn about groundbreaking female astronauts and space research professionals career paths in space exploration how to prepare for the field key skills for success methods of learning more about careers while in school and much more Women in Space Exploration is just one of nine exciting titles in the Women in STEM Careers series Readers will learn about dozens of STEM careers and be inspired by the life stories of female STEM professionals They will also learn why these careers are some of the most exciting best paying and fastest growing occupations in the world

Fuel your quest for knowledge with Learn from is thought-provoking masterpiece, **Women In Space** . This educational ebook, conveniently sized in PDF ( \*), is a gateway to personal growth and intellectual stimulation. Immerse yourself in the enriching content curated to cater to every eager mind. Download now and embark on a learning journey that promises to expand your horizons. .
