Summer Solstice:

Camille Flammarion's The Planet Mars Camille Flammarion, 2014-10-30 Camille Flammarion 1842-1925 began his career at 16 as a human computer under the great mathematician U J J Le Verrier at the Paris Observatory He soon tired of the drudgery he was drawn to more romantic vistas and at 19 wrote a book on an idea that he was to make his own the habitability of other worlds There followed a career as France s greatest popularizer of astronomy with over 60 titles to his credit An admirer granted him a chateau at Juvisy sur l Orge and he set up a first rate observatory dedicated to the study of the planet Mars Finally in 1892 he published his masterpiece La Planete Mars et ses conditions d habitabilite a comprehensive summary of three centuries worth of literature on Mars much of it based on his own personal research into rare memoirs and archives As a history of that era it has never been surpassed and remains one of a handful of indispensable books on the red planet Sir Patrick Moore 1923-2012 needs no introduction his record of popularizing astronomy in Britain in the 20th century equaled Flammarion s in France in the 19th century Moore pounded out hundreds of books as well as served as presenter of the BBC s TV program Sky at Night program for 55 years a world record Though Moore always insisted that the Moon was his chef d oeuvre Mars came a close second and in 1980 he produced a typescript of Flammarion s classic Unfortunately even he found the project too daunting for his publishers and passed the torch of keeping the project alive to a friend the amateur astronomer and author William Sheehan in 1993 Widely regarded as a leading historian of the planet Mars Sheehan has not only meticulously compared and corrected Moore s manuscript against Flammarion s original so as to produce an authoritative text he has added an important introduction showing the book s significance in the history of Mars studies Here results a book that remains an invaluable resource and is also a literary tour de force in which the inimitable style of Flammarion has been rendered in the equally unique style of Moore

Landscape of the Spirits Todd W. Bostwick, Peter Krocek, 2002-09-01 High above the noise and traffic of metropolitan Phoenix Native American rock art offers mute testimony that another civilization once thrived in the Arizona desert In the city s South Mountains prehispanic peoples pecked thousands of images into the mountains boulders and outcroppings images that today s hikers can encounter with every bend in the trail Todd Bostwick an archaeologist who has studied the Hohokam for more than twenty years and Peter Krocek a professional photographer with a passion for archaeology have combed the South Mountains to locate nearly all of the ancient petroglyphs found in the canyons and ridges Their years of learning the landscape and investigating the ancient designs have resulted in a book that explores this wealth of prehistoric rock art within its natural and cultural contexts revealing what these carvings might mean how they got there and when they were made Landscape of the Spirits is the first book to cover these ancient images and is one of the most comprehensive treatments of a rock art location ever published It conveys the range of different rock art elements and compositions found in the South Mountains animals humans and geometric shapes as well as celestial and calendrical markings at key sites through accurate descriptions drawings and

photographs Interpretations of the petroglyphs are based on Native American ethnographic accounts and consider the most recent theories concerning shamanism and archaeoastronomy Written in a simple and accessible style Landscape of the Spirits is an indispensable volume for anyone exploring the South Mountains and for rock art enthusiasts everywhere who wish to broaden their understanding of the prehistoric world It is both an authoritative overview of these ancient wonders and an unprecedented benchmark in southwestern rock art research at a single geographic location

The Architect's Studio Companion Edward Allen, Joseph Iano, 2006-11-28 The architect's favorite handbook more informative and easier to use than ever The Architect's Studio Companion is the labor-saving design resource that architects and builders have relied on for years Now in its fourth edition this industry standard continues its reputation as a reliable tool for the preliminary selecting configuring and sizing of the structural mechanical and egress systems of a building Bestselling authors Edward Allen and Joseph Iano reduce complex engineering and building code information to simple approximations that enable the designer to lay out the fundamental systems of a building in a matter of minutes and get on with the design Now in a flex binding that makes it even easier to use The Architect's Studio Companion Fourth Edition provides quick access to reliable rules of thumb that offer vital help for selecting configuring and sizing Structural systems Heating cooling and electrical systems Egress provisions including exit stairways parking garages and parking lots Daylight provisions The book concludes with precalculated tables of building code height and area limitations
