## Things We Mean:

**The Things We Mean** Stephen R. Schiffer, 2005      **The Things We Mean** Stephen Schiffer, 2003-09-04 Stephen Schiffer presents a groundbreaking account of meaning and belief and shows how it can illuminate a range of crucial problems regarding language, mind, knowledge, and ontology. He introduces the new doctrine of pleonastic propositions to explain what the things we mean and believe are. He discusses the relation between semantic and psychological facts on the one hand and physical facts on the other, vagueness and indeterminacy, moral truth, conditionals, and the role of propositional content in information acquisition and explanation. This radical new treatment of meaning will command the attention of everyone who works on fundamental questions about language and will attract much interest from other areas of philosophy.

**The Things We Mean** Stephen Schiffer, 2003-09-04 If there exist such things as the things we mean, then those things are also the things we believe and the things in terms of which we must understand all semantic notions. If such entities as the things we mean and believe exist, an account of their nature must be the most foundational concern in the theory of linguistic and mental representation. Schiffer argues that there are such things as the things we mean and believe. They are what he calls pleonastic propositions, and he provides an account of what they are in themselves and of their place in nature, language, and thought. After developing the theory of pleonastic propositions, Schiffer uses it to provide accounts of, among other things, linguistic meaning and knowledge of meaning, the relation between intentional and non-intentional facts, vagueness and indeterminacy, moral discourse, conditionals, and the role of propositional content in information acquisition and explanation. This radical new treatment of meaning will command the attention of everyone who works on fundamental questions about language and will attract much interest from other areas of philosophy.

Meaning and Metaphysical Necessity Tristan Grøtvedt Haze, 2022-06-16 This book is about the idea that some true statements would have been true no matter how the world had turned out, while others could have been false. It develops and defends a version of the idea that we tell the difference between these two types of truths in part by reflecting on the meanings of words. It has often been thought that modal issues, issues about possibility and necessity, are related to issues about meaning. In this book, the author defends the view that the analysis of meaning is not just a preliminary to answering modal questions in philosophy; it is not merely that before we can find out whether something is possible, we need to get clear on what we are talking about. Rather, clarity about meaning often brings with it answers to modal questions. In service of this view, the author analyzes the notion of necessity and develops ideas about linguistic meaning, applying them to several puzzles and problems in the philosophy of language. Meaning and Metaphysical Necessity will be of interest to scholars and advanced students working in metaphysics, philosophy of language, and philosophical logic.

Finding a Replacement for the Soul Brett Bourbon, 2009-06-30 Approaching the study of literature as a unique form of the philosophy of language and mind as a study of how we produce nonsense and imagine it as sense this is a book about our human ways of making and losing meaning Brett Bourbon asserts that our complex and variable relation with language defines a domain of meaning and being that is misconstrued and missed in philosophy in literary studies and in our ordinary understanding of what we are and how things make sense Accordingly his book seeks to demonstrate how the study of literature gives us the means to understand this relationship The book itself is framed by the literary and philosophical challenges presented by Joyce's Finnegans Wake and Wittgenstein's Philosophical Investigations With reference to these books and the problems of interpretation and meaning that they pose Bourbon makes a case for the fundamental philosophical character of the study of literature and for its dependence on theories of meaning disguised as theories of mind Within this context he provides original accounts of what sentences fictions non-fictions and poems produce a new account of the logical form of fiction and of the limits of interpretation that follow from it and delineates a new and fruitful domain of inquiry in which literature philosophy and science intersect
