Thinking Through Style Michael Dominic Hurley, Marcus Waithe, 2018 What is style and how does it relate to thought in language It has often been treated as something merely linguistic independent of thought ornamental stylishness for its own sake Or else it has been said to subserve thought by mimicking delineating or heightening ideas that are already expressed in the words This ambitious and timely book explores a third more radical possibility in which style operates as a verbal mode of thinking through Rather than figure thought as primary and pre verbal and language as a secondary delivery system style is conceived here as having the capacity to clarify or generate thinking The book's generic focus is on non fiction prose and it looks across the long nineteenth century Leading scholars survey twenty authors to show where writers who have gained reputations as either stylists or as thinkers exploit the interplay between the what and the how of their prose The study demonstrates how celebrated stylists might after all have thoughts worth attending to and that distinguished thinkers might be enriched for us if we paid more due to their style More than reversing the conventional categories this innovative volume shows how style and thinking can be approached as a shared concern At a moment when especially in nineteenth century studies interest in style is re emerging this book reevaluates some of the most influential figures of that age re imagining the possible alliances interplays and generative tensions between thinking thinkers style and stylists

Thinking Through Things Amiria Henare, Martin Holbraad, Sari Wastell, 2007-01-24 Drawing upon the work of some of the most influential theorists in the field Thinking Through Things demonstrates the quiet revolution growing in anthropology and its related disciplines shifting its philosophical foundations The first text to offer a direct and provocative challenge to disciplinary fragmentation arguing for the futility of segregating the study of artefacts and society this collection expands on the concerns about the place of objects and materiality in analytical strategies and the obligation of ethnographers to question their assumptions and approaches The team of leading contributors put forward a positive programme for future research in this highly original and invaluable guide to recent developments in mainstream anthropological theory

Thinking Through Dilemmas Lawrence H. Williams,2020-09-13 Departing from the sociological dual process model that divides thoughts into automatic and unconscious or deliberate and conscious occurrences this book draws on empirical cases to demonstrate the existence of automatic deliberation Through research into the ways in which people address difficult subjects such as death and dying pedophilia and career decision making the author sheds light on a mode of thinking which is both habitual and effortful displaying a combination of habituated understandings and conscious deliberation Advancing a blended view of cognition by which individuals draw on schemas and frames to think through complex topics this volume will appeal to sociologists and psychologists with interests in cognition and the ways in which we make decisions
