Soviet Union And Strategic Arms:

The Soviet Union And Strategic Arms Robbin F Laird, Dale R. Herspring, 1984-11-28 En vurdering af Sovjets sikkerheds og udenrigspolitik i lyset af Sovjets overlegenhed med hensyn til strategiske væben Forfatterne fokuserer på 3 temaer Troen på MAD doktrinen opbygning af en overlegen konventionel militær styrke og overbevisningen om at militær paritet med USA er den vigtigste forudsætning for politisk indflydelse udadtil

Target America Steve Zaloga, 1993 From the development of the A bomb and the role of espionage surrounding it to the dire environmental consequences of its nuclear power program the development of nuclear technology and weaponry in the former Soviet Union is impressively researched in this important pioneering study Photographs Maps

Analyzing Soviet Strategic Arms Decisions Karl F. Spielmann, 2019-03-13 The importance to Western policymakers of determining the significance of Soviet strategic arms decisions is matched by the difficulty of doing so The high stakes involved and in many cases the inadequacy of evidence can all too easily lead to generalizations that rest more on passionate conviction than on accepted principles of scholarly inquiry

The Soviet Union and Arms Control Roman Kolkowicz, Matthew P. Gallagher, Benjamin S. Lambeth, 1970 *Target America* Steven J. Zaloga, 1993-06-01 Provides a detailed examination of how the former Soviet Union became a superpower Takes the reader step by step through the development of Soviet nuclear weapons technology and the development of the systems needed to deliver those weapons to targets in the U S Drawing on secret recently declassified Soviet documents and articles as well as recent revelations from KGB and CIA files Zaloga sheds new light on the role of Klaus Fuchs and the Rosenbergs the so called atomic spies of the late 40s and early 50s A chapter on the 1962 Cuban missile crisis provides a unique perspective on that critical Cold War showdown Photos

Soviet Strategic Arms Policy Before SALT Christoph Bluth, 1992-03-12 In this book Dr Christoph Bluth presents an original analysis of the build up of Soviet strategic forces from the death of Stalin to the SALT I agreement The author is able to demonstrate how domestic priorities and internal power struggles account for the seeming inconsistencies of Soviet military and foreign policy

United States/Soviet Union Strategic Arms Limitations: a Study of Arms Control and Strategic Stability John P. Rose, ARMY COMMAND AND GENERAL STAFF COLL FORT LEAVENWORTH KANS., 1978 The purpose of this study is to discuss the role of arms limitations at the strategic nuclear level between the United States and the Soviet Union as it contributes to arms control in general and to strategic stability in particular This approach to arms control arms limitations is not designed to be technical in nature To judge the usefulness of past and on going strategic arms limitation talks a conceptual framework through which one can assess the utility or non utility of arms control measures is discussed In assessing arms control and strategic stability this study examines U S strategic goals and objectives the rapid and continuous growth of Soviet strategic nuclear force capabilities the SALT I agreements the objectives utility of strategic nuclear forces in both a military and political sense the strategic nuclear balance and the utility of follow on strategic arms agreements The hypothesis of this study suggest that instead of enhancing

strategic stability and promoting moderation of competition in strategic armaments the SALT I accords and post SALT I Soviet behavior illustrate what may be a quest for Soviet strategic superiority rather than parity and a mobilization for war rather than detente and peaceful co existence Author *US Strategic Arms Policy in the Cold War* David Tal, 2017-05-08

This book examines the negotiations between the USA and the USSR on the limitation of strategic arms during the Cold War from 1969 to 1979 The negotiations on the limitation of strategic arms which were concluded in two agreements SALT I and SALT II with only the first ratified marked a major change in the history of arms control negotiations For the first time in the relatively short history of nuclear weapons and negotiations over nuclear disarmament the two major nuclear powers had agreed to put limits on the size of their nuclear strategic arms However the negotiations between the US and USSR were the easy part of the process The more difficult part was the negotiations among the Americans Through the study of a decade of negotiations on the limitation of strategic arms in the Cold War this book examines the forces that either allowed US presidents and senior officials to pave a path toward a US arms limitation policy or prevented them from doing so Most importantly the book discusses the meaning of these negotiations and agreements on the limitation of strategic arms and seeks to identify the intention of the negotiators Were they aiming at making the world a safer place What was the purpose of the negotiations and agreements within US strategic thinking both militarily and diplomatically Were they aimed at improving relations with the Soviet Union or only at enhancing the strategic balance as one component of the strategic nuclear deterrence between the two powers This book will be of much interest to students of Cold War history arms control US foreign policy and international relations in general

Negotiating START Kerry M. Kartchner, The United States and the Soviet Union have been negotiating nuclear arms control agreements for over twenty years yet radical differences remain in the two sides concept of and approaches to strategic stability and arms control This book compares and contrasts those approaches using START Strategic Arms Reduction Treaty as a case study Throughout two decades of negotiation U S policy has been directed toward dialogue that would encourage convergence of American and Soviet thought on nuclear deterrence In Kartchner s view that hope is belied not only by continuing asymmetries in the development and deployment of their strategic nuclear arsenals but by differing U S and Soviet negotiating positions The Reagan administration viewed START as a means of repudiating SALT II restoring a measure of balance in the U S Soviet strategic competition and as a way of closing the so called window of vulnerability In contrast Kartchner analyzes the Soviets differing views of nuclear balance emphasizing their satisfaction with SALT II and a strategic equilibrium shaped by a decade of bilateral arms control Kartchner offers a detailed exposition of the major negotiating issues in START contrasting concerns of U S and Soviet negotiators Not surprisingly each side s agenda was dominated by weapon systems that figure prominently in the other s development program The author concludes by summarizing and comparing American and Soviet quests for stability and drawing up an assessment of U S efforts in both SALT and START to use arms control negotiations as a kind of classroom for

instructing Soviet officials in American notions of stabilizing versus destabilizing weapon technology and America's own ethnocentric view of stability START will profoundly affect the acquisition operation maintenance and cost of U S strategic nuclear forces well into the next century The history and analysis presented here will provide an essential source to policymakers and students of military political relations for much needed further study of this treaty's implications **U.S. Soviet Nuclear Arms Control** Arnold Lawrence Horelick, Edward L. Warner, Rand/UCLA Center for the Study of Soviet International Behavior, 1986 This paper which is included as a chapter in U S Soviet Relations The Next Phase Cornell University Press 1986 analyzes the nuclear arms control dimension of U S Soviet relations as it enters a new phase It reviews the developments and forces that led to the present impasse discusses the nuclear arms agenda before the leaderships of the two states and considers the prospects for future agreements It includes an analysis of the Soviet and American arms control proposals of October and November 1985 and discusses prospects for agreement in the light of congruent and divergent aspects of the two proposals The authors suggest that an arrangement between the superpowers that provided the Soviet Union with assurances against a U S strategic defensive breakout during the lifetime of any new far reaching arms reduction treaty might facilitate conclusion of such an agreement Constraints on flight testing might slow down the pace of the Strategic Defense Initiative SDI depending on precisely where the line was drawn between permitted research and forbidden testing and for how long However in the context of a new treaty reducing nuclear offensive arms continued U S conduct of a vigorous SDI research program within agreed constraints would provide the Soviet Union with strong additional incentives to comply more punctiliously than it has in the past with treaty provisions *The Soviet Union, the West, and the Nuclear Arms Race* Robbin Frederick Laird, 1986 **Nuclear Strategy, Arms Control, And The Future** P. Edward Haley, 2019-03-05 Balanced and comprehensive in approach this text assembles classic statements on nuclear strategy and arms control made by Soviet and U S policymakers military thinkers and opinion leaders during the last forty years Major Soviet statements rarely appearing in translation reflect the disagreement over whether victory or parity is the goal [The Soviet-American Arms Race](#) Colin S. Gray, 1976 [The Soviet Union And Ballistic Missile Defense](#) Bruce Parrott, Helmut Sonnenfeldt, 2020-01-09 Originally published in 1987 In the debate over strategic defense the Soviet dimension has not been adequately examined Dr Parrott's multifaceted discussion of the Soviet approach to ballistic missile defense BMD admirably fills that gap Based on an analysis of Soviet statements and Soviet weaponry the study surveys Soviet perceptions of the shifting relationship between the superpowers and the effect of BMD on that relationship The author then traces the evolution of Soviet policies toward ballistic missile defense and the introduction of weapons into space After exploring the internal budgetary debates that will affect future Soviet decisions on BMD and space systems the book outlines Soviet responses political as well as military to the Strategic Defense Initiative and concludes with recommendations for U S policy toward BMD and arms negotiations *The Big Five* A. G. Savel'ev, Nikolay N. Detinov, 1995-03-30 The first book anywhere to

go inside the Soviet arms control decision making process this book reveals information previously known by no more than a handful of people in the USSR and the U S written by two of the players **Lethal Frontiers** Aleksei Georgievich Arbatov,1988-10-24 Lethal Frontiers is one of the first samples of Soviet scholarship on nuclear strategy readily available to Western readers A rising star in the Soviet foreign policy establishment Arbatov offers a remarkable view of the evaluation of U S nuclear policy and strategy This scholarly book is free of the ideological constraints and negative effects of excessive Soviet secrecy so often characterizing Soviet works on this subject The author begins by tracing the buildup of U S nuclear and conventional forces during the Kennedy and Johnson administrations and examines initial U S reactions to the achievement of strategic nuclear parity by the Soviet Union in the late 1960s and early 1970s From notions of flexible response to the Schlesinger doctrine and ideas of fighting a limited nuclear war Arbatov argues that the U S national security establishment has had enormous difficulty in reconciling itself with Soviet strategic parity Consequently U S strategy and arms programs have invariably collided with and contradicted the arms control process and efforts to decrease U S Soviet tensions In light of this and of the new Soviet approach to security Arbatov observes the challenges lying ahead in the new era of Soviet American relations *The Limitation of Strategic Arms: Testimony of Dr. Robert W. Campbell [and] Dr. Thomas W. Wolfe* United States. Congress. Senate. Committee on Armed Services. Subcommittee on Strategic Arms Limitations Talks,1970 **Security in the Nuclear Age** Jerome H. Kahan,1975 This book provides a valuable and accessible guide to unraveling the complex world of network deregulation It will serve as a reference point for practioners and policymakers as well as an important introduction for the general public The Soviet Union and the Politics of Nuclear Weapons in Europe, 1969-87 Jonathan Haslam,1989-06-30 A comprehensive study of the reasons for the Soviet deployment of the SS 20 missile in the 1970s and the reasons why they agreed to eliminate it in the 1987 INF Treaty In the process Haslam examines the evolution of Soviet foreign and defence policy towards Western Europe in the 1970s and 1980s **The Future of the U.S.-Soviet Nuclear Relationship** National Academy of Sciences,Committee on International Security and Arms Control,1991-02-01 The United States and the Soviet Union could drastically reduce their nuclear arsenals below the levels prescribed by the new Strategic Arms Reduction Treaty START The end of the Cold War and the transformation of international security now under way present the United States with opportunities to develop new policies based on greater international cooperation with the Soviet Union and other major powers This new book describes two lower levels of nuclear forces that could be achieved as well as other related measures to improve international security
